UNIROYAL

For Inhibition of Growth of Trees, Shrubs and Ivy: Apply SLO-GRO to the foliage of trees, shrubs and ivy. For trees and shrubs, apply to the leaves and stems. For ivy, apply to the leaves and stems. Apply in the late summer or early fall. Repeat applications may be necessary.

The following shrubs can be treated: Azalea, Camellia, Forsythia, Gardenia, Hibiscus, Hydrangea, Jasmine, Lilac, Magnolia, Nandina, Rhododendron, Spirea, and others.

DIRECTIONS FOR USE: For trees and shrubs, apply SLO-GRO to the foliage. For ivy, apply to the leaves and stems. Apply in the late summer or early fall. Repeat applications may be necessary.

10X Concentrate Spray: Dilute 1 part concentrate with 9 parts water. Apply to foliage.

When to Spray: Apply in the late summer or early fall. Repeat applications may be necessary.

NOTES:

1. SLO-GRO is a growth retardant and does not kill plants immediately. It slows down growth and eventually kills young plants.

2. SLO-GRO is effective against grass, trees, shrubs and ivy.

3. SLO-GRO is safe for use on lawns, golf courses, parks, sports fields, residential lawns, commercial lawns, industrial lawns, utility lawns, roadsides, ditches, drainage canals, embankments, and other areas where grass, trees, shrubs and ivy are unwanted.

4. SLO-GRO is safe for use on buildings, walls, fences, and other structures.

5. SLO-GRO is safe for use on ivy on buildings, walls, fences, and other structures.

How Slo Gro Inhibits Grass Growth:

SLO-GRO inhibits grass growth by interfering with the normal growth cycle of the grass. It slows down the growth of the grass and eventually kills young plants. SLO-GRO is effective against all types of grass, including annual and perennial grasses.

DIRECTIONS FOR USE: Apply SLO-GRO to the foliage of grass. Apply in the late summer or early fall. Repeat applications may be necessary.

Spring Application: Apply SLO-GRO to the foliage of grass in the late summer or early fall. Repeat applications may be necessary.

For Annual Grasses: Apply SLO-GRO to the foliage of grass in the late summer or early fall. Repeat applications may be necessary.

For Perennial Grasses: Apply SLO-GRO to the foliage of grass in the late summer or early fall. Repeat applications may be necessary.

Controlling Annual Blue Grass:

Annual blue grass is a common weed in lawns and golf courses. SLO-GRO is effective against annual blue grass. Apply SLO-GRO to the foliage of annual blue grass in the late summer or early fall. Repeat applications may be necessary.

Controlling Annual Blue Grass: Apply SLO-GRO to the foliage of annual blue grass in the late summer or early fall. Repeat applications may be necessary.

Controlling Annual Blue Grass: Apply SLO-GRO to the foliage of annual blue grass in the late summer or early fall. Repeat applications may be necessary.

Controlling Annual Blue Grass: Apply SLO-GRO to the foliage of annual blue grass in the late summer or early fall. Repeat applications may be necessary.

Controlling Annual Blue Grass: Apply SLO-GRO to the foliage of annual blue grass in the late summer or early fall. Repeat applications may be necessary.
