DIRECTIONS FOR USE

VITAVAX-300 Fungicide is a wettable powder seed treatment for use as a dry dust. Spray-mist, or slurry seed treatment. In liquid systems, a thin paste should first be made using a portion of the required water and the recommended amount of VITAVAX-300 Fungicide. Stir this paste into the remainder of the water and provide enough agitation to maintain a uniform water suspension.

COTTON

VITAVAX-300 Fungicide combines the systemic action of carboxin with the surface action of captan to control various seed and seedling diseases of cotton. Seed rot, damping-off and sore-shin due to Rhizoctonia solani are prevented. VITAVAX-300 Fungicide can be used on both machine and acid delinted cottonseed. Use 8 ounces of VITAVAX-300 Fungicide per 100 pounds of seed.

COMPATIBILITY (cotton only) VITAVAX-300 Fungicide can be used in combination with commonly used cottonseed treatment insecticides such as Di-Syston or Thimet.

USE RESTRICTIONS - Do not use treated seed for food, feed or oil purposes. Do not graze or feed livestock on hay grown from treated seed.
