USE RESTRICTIONS

When using formulations that do not contain dye, to comply with 21CFR Chapter 1, Section 2.25, all grain seed treated with an economic poison must be colored with an approved dye (40 CFR 108.1001) to distinguish and prevent subsequent and inadvertent use as food for man or feed for animals. Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time. Do not graze or feed livestock on treated areas for six weeks after planting.

"Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Seed commercially treated with VITAVAX Flowable Fungicide must be labeled in accord with all applicable requirements of the Federal Seed Act. On corn, barley, and wheat, do not graze or feed livestock on treated areas for six weeks after planting." Add appropriate information for any other chemical treatments.
