

UNIROYAL PERMAGARD concentrate no. 10

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS WARNING

May be fatal if swallowed. May be absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling. Avoid contamination of food and feed. Keep out of reach of domestic animals. Do not use on humans, household pets, or livestock.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Birds and other wildlife in treated areas may be killed. Do not apply directly to water. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Prohibitions. Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal:

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal:

Triple rinse all equipment that has been used with concentrate. Do not reuse for food or drink. Do not discharge to sewer. Do not burn or incinerate. Do not reuse for any other purpose. Do not reuse for any other purpose. Do not reuse for any other purpose.

WARNING

STATEMENT OF PRACTICAL TREATMENT

Ingestion: Call a physician immediately. Gastric lavage is indicated if material is still in the stomach. Do NOT INDUCE vomiting unless other treatment is available. Vomiting may cause aspiration pneumonia. If necessary, induce vomiting by giving one or two glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not force food or give anything by mouth to an unconscious person.

Inhalation: Remove to fresh air. Apply respiration if indicated.

On skin: Wash immediately with soap and water.

In eyes: Flush eyes for at least 15 minutes with water. Call a physician immediately.

See side panels and booklet for additional precautionary statements.

Permagard Concentrate No. 10 is especially designed for the preparation of solutions for treating wooden objects for protection against termites, lyctus beetles and wood-rotting fungi. It is also an excellent soil poison for termites and is widely used as a general contact weed killer.

Wood Treatment: Before use, dilute 1 gallon Permagard Concentrate No. 10 with 10 gallons of suitable oil, such as kerosene, fuel oil or mineral spirits. Fence posts, pickets and rails should be free of bark, dry and well-seasoned and be dipped in this solution for 12 to 48 hours for efficient control of wood-destroying pests. To treat building framing, window sash, window and door framing and general repairs, apply by dipping, brushing or spraying. Dipping time should be from 3 to 30 minutes depending upon the type of wood treated and the speed with which it absorbs the solution. Two coats should be used when applied by brush or spray.

Generally, millwork will absorb about 1 gallon of the 5% emulsion solution per 100 board feet. When treating existing structures, two applications by spraying are preferred as better coverage and penetration are obtained.

For surfaces that are to be painted, dilution should be made with mineral spirits or Stoddard solvent and time allowed for the solvent to evaporate after treating. This may require one or more days depending upon the temperature and air circulation around treated material and previous seasoning of the wood treated.

Weed Killing: As an effective general contact herbicide to be used over waste areas, around buildings, along paths and roadways and similar places. To kill most grasses and broad-leaved weeds, dilute 1 to 2 quarts Permagard Concentrate No. 10 with 10 gallons of kerosene, diesel fuel or fuel oil, and spray to thoroughly wet vegetation to be killed. Re-treat surviving vegetation. Do not apply to areas underlaid by roots of desirable trees and shrubs.

**SUBTERRANEAN TERMITES:
DIRECTIONS FOR HOMEOWNERS USE
TERMITE CONTROL IN EXISTING STRUCTURES-
BUILDINGS WITH BASEMENTS OR CRAWL-SPACES**

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back-fill. Likewise, treat along the inside of foundations of crawl-space buildings. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

USE PRECAUTIONS

Permagard Concentrate No. 10 is a highly toxic material. It is a powerful irritant to the eyes, nose, throat and skin. It is also a powerful irritant to the respiratory system. It is a powerful irritant to the digestive system. It is a powerful irritant to the mucous membranes. It is a powerful irritant to the lungs. It is a powerful irritant to the heart. It is a powerful irritant to the kidneys. It is a powerful irritant to the liver. It is a powerful irritant to the spleen. It is a powerful irritant to the pancreas. It is a powerful irritant to the gallbladder. It is a powerful irritant to the intestines. It is a powerful irritant to the stomach. It is a powerful irritant to the esophagus. It is a powerful irritant to the pharynx. It is a powerful irritant to the larynx. It is a powerful irritant to the trachea. It is a powerful irritant to the bronchi. It is a powerful irritant to the bronchioles. It is a powerful irritant to the alveoli. It is a powerful irritant to the capillaries. It is a powerful irritant to the veins. It is a powerful irritant to the arteries. It is a powerful irritant to the nerves. It is a powerful irritant to the muscles. It is a powerful irritant to the bones. It is a powerful irritant to the cartilage. It is a powerful irritant to the ligaments. It is a powerful irritant to the tendons. It is a powerful irritant to the skin. It is a powerful irritant to the hair. It is a powerful irritant to the nails. It is a powerful irritant to the teeth. It is a powerful irritant to the gums. It is a powerful irritant to the tongue. It is a powerful irritant to the throat. It is a powerful irritant to the voice. It is a powerful irritant to the hearing. It is a powerful irritant to the vision. It is a powerful irritant to the taste. It is a powerful irritant to the smell. It is a powerful irritant to the touch. It is a powerful irritant to the pain. It is a powerful irritant to the temperature. It is a powerful irritant to the humidity. It is a powerful irritant to the pressure. It is a powerful irritant to the oxygen. It is a powerful irritant to the carbon dioxide. It is a powerful irritant to the nitrogen. It is a powerful irritant to the hydrogen. It is a powerful irritant to the helium. It is a powerful irritant to the neon. It is a powerful irritant to the argon. It is a powerful irritant to the krypton. It is a powerful irritant to the xenon. It is a powerful irritant to the radon. It is a powerful irritant to the uranium. It is a powerful irritant to the plutonium. It is a powerful irritant to the americium. It is a powerful irritant to the curium. It is a powerful irritant to the berkelium. It is a powerful irritant to the californium. It is a powerful irritant to the einsteinium. It is a powerful irritant to the fermium. It is a powerful irritant to the mendelevium. It is a powerful irritant to the nobelium. It is a powerful irritant to the lawrencium. It is a powerful irritant to the rutherfordium. It is a powerful irritant to the dubnium. It is a powerful irritant to the seaborgium. It is a powerful irritant to the bohrium. It is a powerful irritant to the hassium. It is a powerful irritant to the meitnerium. It is a powerful irritant to the darmstadtium. It is a powerful irritant to the roentgenium. It is a powerful irritant to the copernicium. It is a powerful irritant to the nihonium. It is a powerful irritant to the flerovium. It is a powerful irritant to the livermorium. It is a powerful irritant to the tennessine. It is a powerful irritant to the oganesson.
