

UNIROYAL PENTA MR

5% PENTA

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

WARNING
May be fatal if swallowed. May be absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling. Avoid contamination of food and feed. Keep out of reach of domestic animals. Do not use on humans, household pets, or livestock.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds, and other wildlife. Birds and other wildlife in treated areas may be killed. Do not apply directly to water or wetlands. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL or CHEMICAL HAZARDS
Do not use, pour, spill or store near heat or open flame

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or empty container is a violation of Federal Law. If the waste cannot be disposed of by the user, send to a dealer, distributor, or your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

COMPOSITION

Active Ingredients (by weight)	
Pentachlorophenol*	4.25%
Other chlorophenols and related compounds	0.75%
Petroleum distillate	84.50%
Polymerized resin acids	5.00%
Inert Ingredients	5.50%
Total	100.0%

*Contains 5% Technical Pentachlorophenol as defined in Federal Specifications TT-W-570
**TECHNICAL PENTACHLOROPHENOL
5 POUNDS PER GALLON**

**KEEP OUT OF REACH OF CHILDREN
WARNING**

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED Call a physician immediately. Gastric lavage is indicated if material was taken internally. **DO NOT INDUCE** vomiting unless other treatment is not available. Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting, give victim one or two glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED Remove victim to fresh air. Apply respiration if indicated.

IF ON SKIN Wash immediately with soap and water.

IF IN EYES Flush eyes for at least 15 minutes. Call a physician immediately.

SEE LEFT SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENT.

Mfg. by UNIROYAL CHEMICAL -- Division of UNIROYAL, Inc.
Newtown, Connecticut 06770
EPA REG. NO. 400 260
EPA EST. NO.

Lot No. 9-29 83

ACCEPTED

DEC 9 1983

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registration number 400-260

NET CONTENTS

Wood Preservative, Water Repellent. Stops Decay in Homes, Buildings, Fence Posts, Timbers.

REDUCES WARPING AND SHRINKAGE

Treated Surfaces May be Painted—Meets Specifications of Western Pine Association

Penta MR is especially designed for treating wooden objects for protection against insects and decay. Penta MR is also an excellent soil poison for termites and a general contact weed killer.

Wood Treatment: Fence posts, pickets and rails should be free of bark, dry and well seasoned and be dipped in this product for 12 to 48 hours for efficient control of wood-destroying pests. To treat doors, window sash, framing, porch floors and general repairs, apply by brushing, spraying or dipping. Dipping time should be from 3 to 30 minutes depending upon the type of wood treated and how fast it will absorb the Penta MR. Two coats should be used when applying by brush or spray. Use full strength.

Generally, millwork will absorb about 1 gallon of the Penta MR per 100 board feet when applied by dipping. When treating existing structures, apply two coats of Penta MR. Application by spraying is preferred as better coverage and penetration are obtained.

To paint treated surfaces, allow time for solvent to evaporate. This may require one or more days depending upon temperature and air circulation around treated material.

When treating wood for termite control, treatment should be made after all cuts are made and before use in the structure.

Weed Killing: As an effective general contact herbicide to be used over waste areas, around buildings, along paths and roadways and similar places, to kill most grasses and broad-leaved weeds, apply full strength as a spray to thoroughly wet vegetation to be killed. Re-treat surviving weeds. Avoid spray drift to desirable plants.

SUBTERRANEAN TERMITES

DIRECTIONS FOR HOMEOWNER USE

TERMITE CONTROL IN EXISTING STRUCTURES—BUILDINGS WITH BASEMENTS OR CRAWL SPACES

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete, dig a trench 6 inches wide and 4 inches deep. For brick and block foundations, dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. **NEVER DIG BELOW THE TOP OF THE FOOTING.** Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back fill. Likewise, treat along the inside of foundations of crawl space buildings. Cover treated soil with a thin layer of untreated soil.

* For raised porches, terraces and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

USE PRECAUTIONS

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back-flow equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), State and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation, treat as follows: **Do Not Apply Under Pressure.** Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours, then returned to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

IMPORTANT NOTICE — Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions and instructions specified on the label under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product, contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
