Comments for: EPA REG. NO. 400-425  
Omite CR (For CA Only)

The following specific comments pertain to your WPS labeling submission concerning the product cited above:

Since your submitted label requires chemical resistant gloves you need to add the chemical-resistant category statement to your label to state: "Some materials that are chemical-resistant to this product are listed below. If you want more options, follow instructions for category "?" on an EPA chemical-resistant category selection chart." The exact location is shown in Section A on Part 1 of the Product Worksheet. If you were carrying over the chemical resistant gloves from your former label you need to determine if waterproof gloves or chemical resistant gloves would be the most appropriate based on the composition of your product.

If chemical resistant gloves are the most appropriate based on your formulation, change the statement to "chemical resistant gloves such as "?", or "?", or "?" where "?" represents the various glove types specified in the EPA chemical-resistant category selection chart.
