GENERAL INSTRUCTIONS

385

OMITE-CR is a dry wettable powder for preparing sprays to control mites.

OMITE-CR is not systemic in action; therefore complete coverage of both upper and lower leaf surfaces and of fruit is necessary for effective control. OMITE-CR can be used in concentrate sprays.

MIXING INSTRUCTIONS

This package contains 2 x 1½ pound water soluble bags of OMITE-CR. After opening package:

1. Fill spray tank with ½ the required amount of water and turn on agitation system.
2. Do not open or perforate the inner water soluble bags of OMITE-CR. The water soluble bags and contents will dissolve in water.
3. Immediately put water soluble bag into spray tank and mix using vigorous agitation.
4. Fill tank with the remaining amount of required water.
5. Do not touch water soluble bags as handling may cause breakage.
6. Use only entire water soluble bag. Do not break bags or use partial bags.
7. Do not begin spraying until the bag is completely dissolved and the powder is thoroughly dispersed in the spray tank.
8. Do not use in spray systems with roller pumps.
9. If only one water soluble bag is used, store the remaining bag in the original package in a dry location away from heat or cold.
10. IMPORTANT: Do not use screens finer than 25 mesh in spraying equipment.

APPLICATION NOTES:

1. Apples and Hops: Leaf injury and/or fruit spotting may occur if Diazinon WP if air temperatures are expected 95°F the day of spraying apples and hops.

Do not apply in combination with Guthion emulsifiable concentrate.

Use caution in areas East of the Rockies when poor drying conditions exist and when air temperatures exceed 85°F during application. Optimum temperature range for application is 65° to 85°. Apply under optimal drying conditions. Caution should be taken when applying to drought stressed trees.

Do not mix with petroleum oil or oil based formulations of other products. Do not apply petroleum oils 14 days prior to or 14 days after applying OMITE. See Compatibilities.

2. Lemons: OMITE-CR may cause some leaf burn on new growth (feather growth) of lemons.

Omite performance is best when daily temperatures average above 70°F.

Do not apply petroleum oils 30 days prior to or 40 days after applying OMITE.

3. Ornamentals: 1½ lb. of OMITE-CR per 150 gallons of water equals 1 ounce (28.4 grams) per 6.25 gallons. The user should initially treat only a small portion of his crop to confirm plant safety under his conditions. Applications in temperatures exceeding 85° may result in phytotoxic symptoms.

4. Christmas Trees and Conifers: Higher or lower gallonage can be used depending upon tree size, mite populations and equipment used to obtain thorough coverage.

5. Strawberries: Fruit and leaf damage to strawberries has been observed under the following conditions: 1) when OMITE-CR is applied with other chemicals or spray adjuvants; 2) when temperatures on the application date reach 75°F, or within a few days thereafter; 3) when rain falls on the application date or within a few days thereafter. **BY USING THIS PRODUCT, THE USER AND GROWER ACCEPT ALL RISKS OF FRUIT OR LEAF DAMAGE ARISING FROM THE CONDITIONS DESCRIBED ABOVE.**

FOR USE AFTER HARVEST AND ON NON-BEARING TREES ONLY
Non-bearing trees are those that will not bear fruit within one year of Omite Application

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a dry location.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Place water soluble bag directly into application equipment (see directions). Then dispose of empty outer bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.
