GENERAL INFORMATION

VIGILANTE FLYSTOP BOLUS provides a 5 month fly control by treating the manure of each animal. The Fly Growth Regulator we use breaks the fly life cycle by preventing the formation of the fly's exoskeleton when they molt (resulting in their death). This is a reduced risk pesticide and there is no withdrawal for meat or milk.

Treat your cattle with VIGILANTE Fly Stop in the Spring when you deworm and vaccinate. In this way you have treated the manure from the early Spring right into the Fall. For complete Fly Control also use Pour On's and Insecticide Tags to kill the adult flies. No resistance with the VIGILANTE FLYSTOP BOLUS, it stops all pyrethroid and organophosphate resistant flies from ever taking flight.

APPLICATION INSTRUCTIONS

Administer Bolus using standard balling gun according to the operating instructions which accompany the instrument.

DO NOT exceed one bolus for 500 kilograms (1100 lbs.) of body weight. Each animal should be treated according to the following table.

FOR CATTLE WEIGHING	ADMINISTER THIS
WEIGHING	NUMBER OF BOLUSES
300 to 550 lbs.*	1/2
550 to 1100 lbs. or greater**	1
*DO NOT administer to cattle weighing less than 300 lbs.	
**DO NOT administer more than one bolus to an animal weighing more than 1100 lbs.	

Initiate treatment at the beginning of the target fly season or in accordance with local recommendations.
