DIRECTIONS

Squeeze tablespoon quantities of bait in suitable container about 10 feet apart where rats feed water or travel. This is a complete bait and needs no other additives or attractants. Bait placements along walls in corners and in concealed locations where rats can feed unobserved are desirable. Bait should be placed in locations not accessible to children, pets and domestic animals or in tamperproof bait boxes. Baits should be left out for three days after which all those uneaten should be collected and destroyed. If any sign of rats is noted after one week wait four additional weeks then repeat.

CAUTIONS

Keep out of the reach of children and pets. Do not contaminate or store near feed or foodstuffs.

ACTIVE INGREDIENT	Red Squill*	10%
INERT INGREDIENTS		90%
	Total	100%

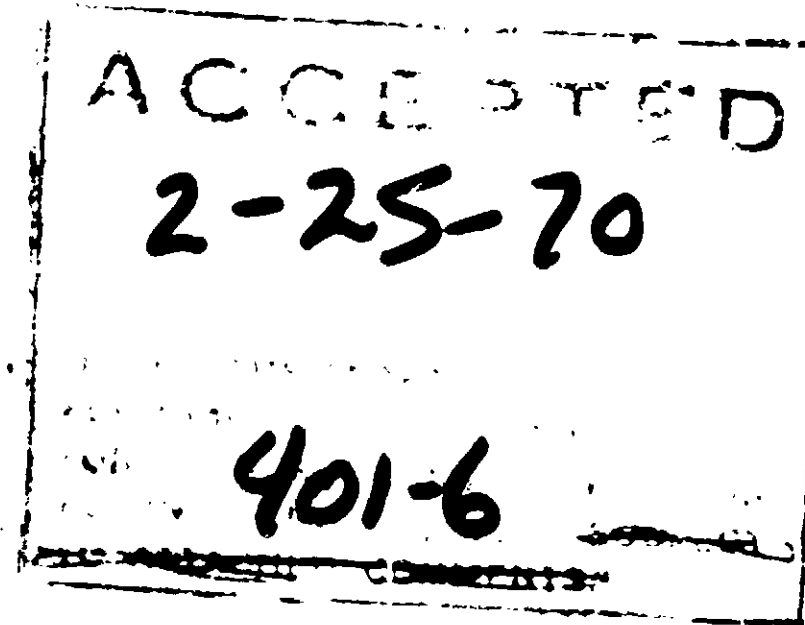

*Minimum toxicity for male albino rats equals LD50: 100 mg/kg
