

# SWIMMING POOL ALGAECIDE

For the control and prevention of algae in swimming pools

ACTIVE INGREDIENTS ..... 10%  
N-alkyl (50% C<sub>12</sub>, 40% C<sub>10</sub>, 10% C<sub>8</sub>) Dimethyl Benzyl Ammonium Chloride  
INERT INGREDIENTS ..... 90%

**WHEN ALGAE ARE FIRST VISIBLE:** Add one (1) gallon of ALGAECIDE to each 10,000 gallons of water, pouring into the water from various locations around the pool's circumference. Remove all dead growth.

**TO PREVENT THE GROWTH OF ALGAE:** Add one (1) gallon of ALGAECIDE to each 50,000 gallons of water and maintain an effective ALGAECIDE concentration by adding one (1) gallon of ALGAECIDE to each 50,000 gallons of water every seven (7) days.

**FOR USE AS A DISINFECTANT AGENT TO AID IN PREVENTING TRANSMISSION OF ATHLETE'S FOOT FUNGI:** As a disinfectant agent to aid in preventing transmission of Athlete's Foot Fungi in locker rooms, swimming pools, etc., dilute by dissolving four (4) ounces of disinfectant in one (1) gallon of water. Scrub walkways, shower floors, foot bath surfaces, rubber mats, and other surfaces contacted by the feet periodically.

## DANGER: KEEP OUT OF REACH OF CHILDREN

Do not contaminate food or feed. For industrial use only. Harmful if swallowed. Do not get in eyes or on skin. In case of contact, flush with water. If irritation persists, get medical attention.

Causes eye damage. Wear goggles or face shield when handling.

This product is toxic to fish. Do not discharge treated effluent into lakes, streams or ponds.

Rinse empty drum thoroughly with water and discard it.
