McConnon Potato and Tomato Diest is a convenient, ready-to-use garden dust. When used as directed, it is an effective combination of insecticide and fungicide to control the insects and diseases on the crops listed below.

CROPS

PESTS AND DISEASES CONTROLLED

QTATOOTAMOT

PESTS: Colorado potato beetle, leafhoppers, flea beetles, lace bugs, tomato fruitworm, tomato hornworm, stink bugs and tarnished plant bugs.

DISEASES: Early and late blight, Anthracnose, and grey leaf mold.

McConnon Potato and Tomato Dust may be applied up to 5 days of harvest.

SWEET CORN

PESTS: Corn rootworm adults, fall armyworm, flea beetles, Japanese beetles and leafhoppers. Do not feed treated forage to livestock.

McConnon Poteto and Tomato Dust may be applied up to 7 days before harvest.

CARROTS

MELONS

PESTS: Fleabeetles, leafhoppers, tarnished plant bugs and stink bugs.

DISEASES: Alternaria leaf spot and Cercospora leaf spot. Do not use tops for food or feed purposes.

McConnon Potato and Tomato Dust may be applied up to 7 days before harvest.

CUCUMBERS SUMMER SQUASH PESTS: Cucumber beetles, squashbug, melonworm, pickleworm, flea beetles

and leafhoppers.

DISEASES: Scab, Anthracnose, downy mildew, Alternaria leaf spot,

Cercospora leaf spot and gummy stem blight.

McConnon Potato and Tomate Dust may be applied up to 5 days of harvest.

DIRECTIONS FOR USE: McConnon's Potate and Tomato Dust may be used in conventional hand duster or sprinkled from small holes made in the can. Before applying please read label carefully and use strictly in accordance with label cautions, warnings and directions. Apply McConnon Potato and

Tomato Dust as soon as foliage appears. McConnon's Potato and Tomato Dust should be applied to all exposed parts of the plant including the lower leaf surface. To control the insects and diseases listed on the chart that can affect these crops, repeat dusting at 5 to 10 day intervals.

BEE CAUTION: MAY KILL HONEY BEES IN SUBSTANTIAL NUMBERS

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your cooperative Agricultural Extension Service.

Do not use when value of bees as pollinators is more important than insect control. Before applying, warn beekeepers to locate hives beyond the flight range until I week after application or to take other equally effective precautions.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with the actions herewith.

NOTE: This container is sold by weight and not by volume. If it does not appear full when opened, it is because contents have settled during shipping.

Mc Connon POTATO and TOMATO DUST

INSECTICIDE — FUNGICIDE Contains "Carbaryl"

For Control of Garden Insects and Diseases listed on the back panel

ACTIVE INGREDIENTS: Carbaryl (1-naphthyl N-methylcarbamate) A Coordination product of zinc ion and	5.0 %
manganese ethylene bisdithiocarbamate (Metallic manganese content .96%, metallic zinc content .12%)	4.8%
INERT INGREDIENTS:	90.2%
TOTAL	100.0%

EPA Registration No. 404-326
