PROPOSED LABELING

IMPERIAL LAWN WEED KILLER
Contains Banvel[†] D (Dicamba) and 2,4-D

DIRECTIONS

Lawn and ornamental turf use: Dilute with water and apply as a spray. For best results, apply when air temperatures are 50° to 95° F. To minimize drift, use coarse spray. One gallon of mixed spray should cover about 250 square feet.

For early season use against broadleaf plantain, buckhorn plantain and dandelions, MIX 1 TABLESPOON IMPERIAL LAWN WEED KILLER PER GALLON OF WATER. Apply to thoroughly wet weeds.

For late season use against mature broadleaf plantain, buckhorn plantain, dandelions, and for control of wild onion, garlic, henbit, chickweed, white clover, poison ivy and poison oak, MIX 1½ TABLESPOON IMPERIAL LAWN WEED KILLER PER GALLON OF WATER. Apply to thoroughly wet all plant foliage. On wild onion and garlic, repeat treatment Spring and Fall. NOTE: Do not apply within the drip line of trees and shrubs.

CAUTION

Avoid contact with skin, eyes and clothing. In case of contact flush with abundance of water; for eyes, get medical attention. Do not take internally. Keep out of the reach of children.

IMPORTANT

Avoid drift of spray (coarse sprays are less likely to drift) onto vegetables, flowers, ornamental shrubs, trees, and other desirable crop plants. Do not apply within the drip line of small trees or shrubs. Do not contaminate domestic or irrigation waters. Do not pour solution used to clean sprayer near desirable trees or shrubs or where it may contaminate water. Do not store in direct contact with fertilizer, seeds, insecticides or fungicides. Do not use on centipede grass, St. Augustine grass or dichondra nor on lawns or turf where desirable bent-grass or clovers are present. Do not use on newly seeded lawns or turf. When container is empty immediately wash thoroughly and destroy. Never re-use. Use spray equipment for applying 2,4-D combinations only to turf.
