

[407-321]

**DIRECTIONS**

**DO NOT DILUTE**

Use in all types of backrubbers. In automatic oilers, refill when necessary. On burlap oilers apply at the rate of one gallon per 20 linear feet of length initially. Recharge every two weeks or as necessary for control. Do not oversaturate. These devices should be made continuously accessible, one to each 35-45 head of cattle.

**NOTE:** Placement of backrubbers must be where cattle normally loaf, near water troughs, shade, or salt boxes. Wrap and charge brace poles and wires to allow cattle to rub their faces and heads.

**Use Precautions**

Do not allow cattle to use a backrubber that is saturated to the point of run-off with this material. Do not make accessible to dairy animals. Do not spray on livestock. Do not use on calves less than one month old.

**CAUTION**

Harmful if swallowed. Avoid contact with eyes, skin and clothing. In case of contact wash thoroughly
