

This product controls a wide range of vegetation, including both broadleaf and broadleaf weeds. It acts by root and leaf absorption and leaves a temporary residue in the soil for control of weeds as they germinate. Action is slow under dry conditions and several days may be required before effects become full evident. Control is normally maintained for extended periods in a single season.

Partial list of species controlled includes: dandelion, lamb's-ear, clover, plantain, bermudagrass, bluegrass, mustard, pigweed, junco, vine, spotted spurge, watergrass, crabgrass.

This product is recommended for killing weeds and preventing new weed growth in driveways, walkways, parking areas, under fences, around garages and other buildings, and in other non-crop areas where vegetation is not wanted, and also for edging walkways, driveways and curb areas.

PREPARING THE SPRAY: This product mixes easily in water with agitation. Add the required amount to the water and stir until a uniform mixture is obtained. If mixture is allowed to stand overnight before using.

FOR SPRAYER APPLICATION: Add one quart WEED AND GRASS KILLER NO. 1 to two quarts of water. Spray vegetation to wet. Also spray soil or gravel to prevent new weed seedlings from germinating. Use this amount of spray mixture on 250 square feet of area for top kill of weeds and temporary prevention of the germination of new weed seedlings. Where weeds are large or persistent to maintain control for extended periods, treat 100 square feet with the three quarts of spray mixture.

FOR SPRINKLING CAN APPLICATION: Add one quart WEED AND GRASS KILLER NO. 1 to two gallons of water. Use the amount on 250 square feet of area for top kill of weeds and temporary prevention of the germination of new weed seedlings. Where weeds are large or more permanent control is desired, treat 100 square feet with this amount of mixture. Sprinkle as uniformly as possible, wetting both the soil and the growing plants. For optimum results, use the sprinker can capacity over the area to be treated. Do not extend area treated in the other direction. Weed the area as usual with the detergent and water after use.

CERTAIN HOSE PROPORTIONERS may be used to spray the area to be treated. Use the amount of mixture that will spray the area to be treated with the hose through the nozzle.

Do not use this product on lawns, lawns, or other areas where it is not intended to be used. Do not use on lawns, lawns, or other areas where it is not intended to be used. Do not use on lawns, lawns, or other areas where it is not intended to be used.

Imperial

WEED AND GRASS KILLER NO. 1

One Quart Will Treat 250 Square Feet Of Area
FOR:
WALKS, DRIVEWAYS, EDGING, PATIOS, UNDER FENCES,
GRAVELED AREAS

ACTIVE INGREDIENTS:	
Erbon (2-(2,4,5-trichlorophenoxy) ethyl-2,2-dichloropropionate)	9.92%
Related Compounds	3.55%
INERT INGREDIENTS:	86.53%
(Contains 1 pound per gallon active ingredients.)	
Total	100.00%

CAUTION
KEEP OUT OF REACH OF CHILDREN
SEE SIDE PANEL FOR ADDITIONAL CAUTIONS:
DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

NET CONTENTS

Manufactured by:
IMPERIAL INC.
SHENANDOAH, IOWA 51601

NOTE: With any application method, it is important to apply the right amount of chemical on each area treated, regardless of the amount of water used. This dosage is a minimum of one quart WEED AND GRASS KILLER NO. 1 per 250 square feet of area. Follow label directions.

IMPORTANT

Apply before weeds and grass get into the ground before weed seedlings germinate. In some areas such as California, the best time to apply is just before or as fall rains start and weeds are beginning to grow.

Storage Directions: Do not store at temperatures above 100° F. for extended periods of time. Store only in original containers.

CAUTION: HARMFUL IF SWALLOWED. KEEP OUT OF THE REACH OF CHILDREN. CAUSES SKIN IRRITATION. CAUSES EYE IRRITATION. Avoid Skin Contact, Avoid Eye Contact, Avoid Contact With Clothing. In case of contact, wash skin with soap and plenty of water; for eyes, flush immediately with plenty of water for at least 15 minutes and get medical attention. Do not wear contaminated clothing or shoes.

CAUTION: Do not apply directly to or otherwise permit to come into contact with desirable fruit, vegetables, flowers, and crops, fruit plants, ornamentals, or other such plants. Contact sprays are less likely to drift. Do not contaminate irrigation water or water used for domestic purposes. Do not store in areas where soil may contain roots of desirable shrubs and trees. There may be a slight staining of patio decks. Clean spray equipment thoroughly before using for other purposes.

This product is toxic to fish. Keep out of area that contains fish. Do not contaminate water by direct application or disposal. Equipment or disposal of waste. Do not reuse containers. Do not burn when empty.

NOTE: Seller warrants that the product is as described in the label description and is reasonably safe for the purpose stated on the label when used in accordance with directions, under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE extends to the use of this product contrary to the label instructions or under abnormal conditions or under conditions where it is not reasonably foreseeable that it will be used.
