 SHENANDOAH, IOWA 51601

**DIRECTIONS FOR USE**

A starter solution combining liquid fertilizer and a plant growth regulator to be diluted with water. When used as directed the solution will stimulate root formation and development; reduce the stress of transplanting and aid in vigorous plant growth.

**Azaleas, Camellias, Gardenias, Holly, Roses and Hibiscus:** Dilute 3 fluid oz. (6 tablespoons) in 1 gallon water. Use 1/2 gallon of this solution in planting hole and over soil as roots are being covered.

**Shade trees and large ornamentals:** Dilute 3 fluid oz. (6 tablespoons) in 1 gallon water and pour 1 to 2 gallons of this solution into planting holes, over balled roots and on soil as planting progresses. Wet soil thoroughly with water after planting.

**Bedding plants (annual and perennial flowers only):** Dilute 2 fluid oz. (4 tablespoons) in 1 gallon water. Wet planting holes or trenches and soil with 1 pint of this solution as planting progresses.

**CAUTION:** Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact with eyes, flush with water. Wash hands after use.

Do not contaminate water by cleaning of equipment or disposal of waste.

Do not reuse container. Flush with water and destroy when empty.
