## DIRECTIONS

Cinch Wipe-On Fly Repellent may be applied with a hand sprayer delivering coarse droplets, or may be applied with a heavy cloth or sponge (preferably a piece of terry-cloth about one foot square). When applying with a cloth, dampen but do not soak the cloth, and wipe the material opposite to the direction of the hair growth. Avoid soaking to the skin. Pay particular attention to the face, ears, neck and legs. Avoid applying in the eyes. Use at the rate of one to two ounces per day, depending upon the size of the animal.

Treatment should be made daily, preferably in the morning hours. Grooming following treatment will aid in keeping the coat clean and lustrous.

**CAUTION:** Do not soak hair to the skin. Do not contaminate milk or milk handling equipment. Do not store, pour or spill near heat or open flame. Do not reuse container. Destroy when empty. Harmful if swallowed.
