

DIRECTIONS FOR USE

Shake Well Before Using

Remove safety cap, hold can about 4 to 6 inches from area to be treated, with nozzle pointed at wind. Spray the area until it is completely wet. Three to ten seconds are usually enough.

SCREWWORM and BLOWFLY infestations: Use particular care to spray into deep pockets caused by screwworms. Repeat treatment at 5 to 7-day intervals until wound is healed. **To prevent Screw-worm and Blowfly infestations:** Apply directly to all open or fresh wounds such as from dehorning, castration, shear cuts, etc. Treat navels of newborn animals. Freely bleeding wounds may require several treatments. Re-treat as needed until wounds heal.

EAR TICK control: Spray directly into animal's ear. Repeat treatment every 3 days until ear ticks are controlled.

FLEECEWORM infestations: Spray infested area liberally, working toward the center of the infestation. Shearing or removing the wool from the infested area is not necessary. Re-treat every 3 days until infestation is controlled.

CAUTION: INJURIOUS TO EYES. Harmful if swallowed. Do not get in eyes. Avoid breathing spray mists. Avoid contact with skin. Wash hands thoroughly after using. Avoid contamination of food and feedstuffs. Keep out of reach of children.

In case of human eye contact: Flush eyes immediately with plenty of water and get prompt medical attention.

Ronnel is a cholinesterase inhibitor. Do not use this product on any animals simultaneously or within a few days before or after treatment with, or exposure to, cholinesterase-inhibiting drugs, pesticides, or chemicals. Atropine is antidotal; consult a veterinarian at first sign of adverse reaction.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Do Not incinerate. Discard container when empty.

NOT FOR HUMAN USE. FOR EXTERNAL USE ONLY.
