DIRECTIONS FOR USE

APPLY AS A SPRAY—Use a hand mist type or pressure sprayer. Two flowing coats of Penta 5 are usually sufficient to protect joists, timbers and other wood work from Lyctus Powder Post Beetles and Wood Rotting Organisms. Treat all structures which come in contact with the soil. Spray all ends and joints of wood for a distance of 3 to 4 feet as well as around chimneys, cellars and porches.

APPLY with per pli thr to the 4 1

DIPPING dry and well se and other heavy w more construction or before p wood in contact with the soil dip each wood member for 12 to 48 hours to give effective penetration to the wood. Fabricated products such as doors, windows, etc., should be dipped 3 to 30 minutes. All wood members should be free of bark before receiving treatment.

WINTER GRASSES AND BOARD-LEAVED WEEDS IN DORMANT ORNAMENTAL BER-MUDA TURF: To control Chickweed, Hairy Chess Grass, Fescue Grass, Cheat, Annual Bluegrass, Plantains, June Grass and Little Barley Grass add 12 fluid ounces of PENTA 5 to 2½ qts. of Kerosene. Spray this dilute mixture over 1000 sq. ft. of turf area to thoroughly cover the undesirable weeds and grasses. Apply to the lawn only when the ornamental Bermuda Grasses are dormant in the fall and winter after the tops have been killed or in early spring before the new growth starts. Do not increase dosage rates since injury may result to the permanent grasses.

Not recommend for use on Bermuda Pastures.

DIRECTIONS FOR USE

FOR PROTECTION AGAINST TERMITES, TREAT WOOD PRIOR TO USE IN CONSTRUCTION

TERMITE CONTROL IN HOUSES—When termites are known to exist in foundation structures such as supporting pillars in steps and porches as well as in house sidings, and upper structures the soil adjoining the wood or adjacent to termite runs should be treated. Since the Termite nest is in the soil the natural thing to eliminate them is to cut them off from the nest. Open a trench around the foundation or the adjacent wood structures 15 to 30 inches deep, but not below the top of the footing if this is more shallow. Deep foundations should have a 30 inch deep trench. Treat the bottom of the trench with ½ gallon per linear foot and apply ½ gallon to the fill dirt. Inspect treated areas frequently for reinfestations.

WARNING — Harmful if swallowed or absorbed through the skin. Causes skin irritation. Do not breathe vapor, fumes or spray mist. Do not get into eyes, on skin or on clothing. Wash thoroughly. Do not store or use near open flame. Plants or shrubbery should be removed within 3 feet of treatment area or protect with Tar Paper.

Wear protective clothing and rubber gloves when handling the freshly treated lumber.

This product is toxic to fish and wildlife. Keep out of lakes, ponds, and streams. Birds and other wildlife in treated areas may be harmed.

Do not apply in any area not specified on the label. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not reuse containers. Destroy when empty.

NON WARRANTY

Bartels and Shores warrants that this product conforms to the chemical description on its label. When used in accordance with label directions under normal conditions, Penta 5 is reasonably fit for its intended purposes. Since methods of application, mixture with other chemicals and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.
