

DOUBLE HEADER

Active Ingredients		100.000%
Pyrethrins	0.016%	
Piperonyl Butoxide, Technical*	0.038%	
*Equivalent to .030% of (butylcarbityl) (6-propylpiperonyl) ether and .008% of related compounds		
Beta-butoxy beta-thiocyano diethyl ether	1.000%	
Methoxychlor, Technical*	1.000%	
*Equivalent to .88% of 2,2-bis (paramethoxyphenyl)-1,1,1-trichloroethane and .12% of other isomers and related compounds		
Petroleum distillate	97.946%	

DIRECTIONS FOR USE:

Kills—flies, mosquitoes, gnats, flying moths, roaches, ants, and fleas in homes and buildings.

Quinn's Double Header Insect Spray kills two ways: (1) contains Methoxychlor which controls the insects for which it is recommended for several weeks through the residual effect. (2) Contains quick knock-down and kill ingredients which kill these insects quickly on contact.

Directions for use as a residual spray: For best results for the residual control of roaches, ants, and fleas, thoroughly wet all areas where these insects alight or crawl. In addition, for control of fleas, thoroughly spray animal pet sleeping quarters, floors and floor coverings, and for control of ants, thoroughly spray any trails and areas around door sills and window frames where these pests enter the premises. Repeat applications as necessary.

Directions for use as a general contact spray: Where quick knock-down and kill is desired to control flies, mosquitoes, gnats and flying moths, use as any other fly and mosquito spray. Close windows and doors and spray thoroughly all parts of room and leave room closed 15 minutes. Sweep up dead insects. Repeat when necessary.

CAUTION: Keep away from open flames and garden plants. Keep out of reach of children. This solution, if brought into contact with the skin can cause toxic symptoms. Avoid inhalation and skin contact. In case of spillage on the skin, wash with soap and water. Avoid contamination of foodstuffs. Do not use on household pets or humans. Harmful if swallowed. Do not reuse container. Destroy when empty. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Do not remain in treated areas and ventilate the area after treatment is completed.

Remove pets, birds, and fish bowls from room before spraying.

EPA Reg. No. 416-59

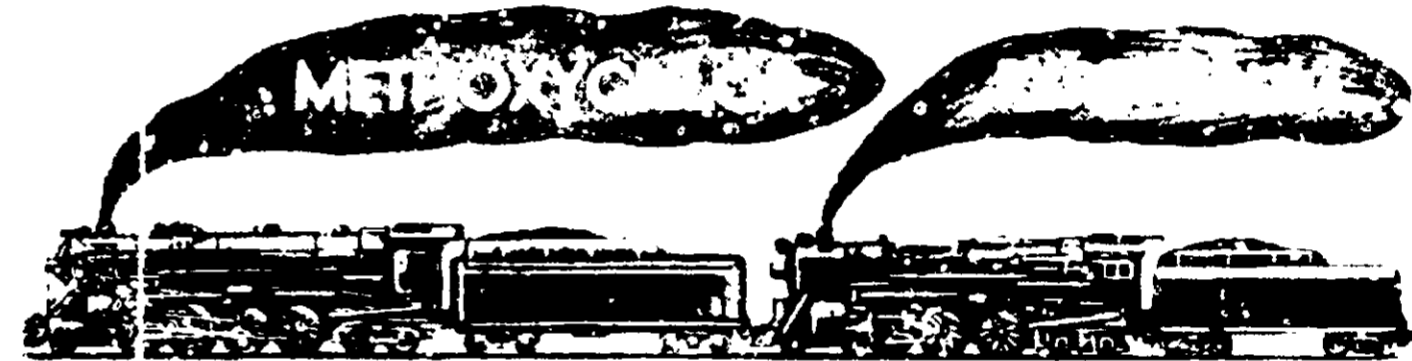

ACCEPTED

JAN 10 1973

UNDER THE FEDERAL INSECTICIDE AND FUNGICIDE ACT AND THE FIFTEENTH AC FOR ECONOMIC POISON REGISTERED UNDER NO. 416-59
