Net Contents — 1 Gallon

CENOX

FOR CERTAIN FLYING INSECTS

FOR USE IN HOUSEHOLD SPRAYERS & FOGGERS

DIRECTIONS

INSIDE HOUSEHOLD

FLIES, MOSQUITOES AND GNATS — Discharge spray mist vigorously in all parts of room using about two ounces for each 1000 cubic feet of space. (Also use in and outside tents when camping). Keep infested area closed during treatment, and leave room closed for ten minutes after treatment. Repeat as often as necessary. Prior to spraying remove children and pets from area to be treated. Cover fish bowls and tanks tightly.

CONTACT SPRAY — (House Flies, Mosquitoes, Roaches, Waterbugs, and Gnats). Apply at the rate of 1½ gallons per 1000 square feet of surface area. Thoroughly wet all favorite resting places such as door and window frames, bannisters, molding, etc. Retreat surfaces as necessary. For roach control, spray cracks and crevices behind stoves and under sinks.

FOGGING

This product is ready for use in foggers. A DRY FOG IS DESIRABLE. Weather conditions are important when fogging. The ideal time is about dusk when the wind is usually less than five (5) M.P.H. and the ground temperature is lower than the air a few feet above ground level. It is recommended that the fogger be held five (5) feet or more away from an object that is being fogged. Do not fog near fire or open flame. Keep out of fish ponds.

CAUTION: Do not spray on or near open flame. Do not contaminate food or food utensils when spraying. Harmful if swallowed. Keep out of reach of children.

Do not remain in treated area. Ventilate the area after treatment is completed.

Do not reuse container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.
