DIRECTIONS FOR USE

For most insects, use a fine stream of spray directed at the insects. Spray until the insects are covered. Repeat application if necessary within 10-15 minutes.

FOR HOUSEFLIES, MOSQUITOES, AND GNATS: Spray the window sill, window frame, and other light areas which attract these insects. For the room, wipe together the treated areas. Keep the room closed for about 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in late evening when insects are at rest. Spray thoroughly at and around possible nesting sites. Repeat as necessary.

For crawling insects, direct spray to produce large wetting film spray particles and use either 0.25% or 0.50% SBP-1382.

FOR ROACHES, EARWIGS, GRAIN MITES, SOWBUGS, SPIDERS, AND CENTIPEDES: Spray thoroughly into hiding places, such as cracks, crevices, under papers, openings in wood paneling, and sinks. Under refrigerators, behind and under cupboards. Spray directly on insect where possible.

ANTS: Spray the base of the nest with the spray, or into where ants enter. Repeat as necessary.

THERMAL APPLICATIONS INDOORS: For effective control, use a fine stream of spray directed at the insects. Do not use in areas where people are sleeping or resting. Do not use in areas where food is prepared or stored. Do not use in areas where people are eating or drinking. Do not use in areas where people are working.

For use in areas where people are not present, use a fine stream of spray directed at the insects. Do not use in areas where people are sleeping or resting. Do not use in areas where food is prepared or stored. Do not use in areas where people are eating or drinking. Do not use in areas where people are working.

THERMAL APPLICATION OUTDOORS: For use in areas where people are not present, use a fine stream of spray directed at the insects. Do not use in areas where people are sleeping or resting. Do not use in areas where food is prepared or stored. Do not use in areas where people are eating or drinking. Do not use in areas where people are working.

DIRECTIONS FOR USE

For most effective results, apply this product to pests in a room
before it is used to receive a maximum of 100% relative humidity
either 0.10% or 0.25% SBP 1382.

FOR HOUSEFLIES, MOSQUITOES, AND GNATS: Spray into and
around windows. Point nozzle toward direct the spray mist toward part
of the room, especially windows and other light sources which attract
these insects. Fill the room with mist, then leave the treated area.
Keep the room closed for at least 15 minutes. Ventilate the room
when treatment is completed.

WASPS: Application should be made in late evening, when insects are
at rest. Spray liberally into hiding and breeding places, contacting
as many insects as possible. Repeat as necessary.

For crawling insects, adjust spray to produce large wetted-type
spray particles and use either 0.25% or 0.50% SBP 1382.

**FOR ROACHES, EARWIGS, GRAIN MITES, SOWBUGS, SPIDERS, AND
CENTIPEDES:** Spray thoroughly into hiding places, such as cracks,
crevices, moist areas, openings around pipes and sinks, under re-
frigerators, baseboards, and storage areas. Spray into any cracks
where possible.

ANTS: Spray trails, nests and points of entry. Spray into cracks
where possible. Repeat as necessary.

THERMAL APPLICATIONS INDOORS: For the control of house
mosquitoes and gnats in warehouses, restaurants and other large applica-
tions. Remove or cover exposed food and food preparation areas.
Remove animals and plant life. Shut off ventilation, ducts,
ducts, air conditioning equipment, and turn off all lights in the
treated area.

Extinguish all flames and pilot lights. Apply as a fog at the rate
of 1-1.3 fluid ounces per 1,000 cu. ft. of space. Direct nozzle of
thermal applicator toward the upper corners of the room and toward
the ceiling. Close off room for at least one hour. Do not remain
in treated area. Ventilate the room after treatment is completed.

THERMAL APPLICATION OUTDOORS: For eradication of mosquitoes
from flies, mosquitoes and gnats in areas of dense vegetation, such as
parks, picnic areas, camp sites, drainage and irrigation systems, and
small area application.

Hold thermal applicator at least five feet from vegetation, animals,
plants and buildings. Add water if desired. Apply at the rate of
3-3.4 gallons at 0.20% SBP 1382 for most applications. When the
equivalent of 1-1.3 oz. per 1,000 cu. ft. For use when there is a
 breeze or the wind is blowing, the three-minute period of applica-
tion is generally sufficient when the wind is blowing out the product.
perature and relative humidity are approximately 70-80% and
the temperature is 70-80°F. Apply to the treated area to be
eradicated. Apply to the treated area to be eradicated. Apply to the
treated area to be eradicated. Apply to the treated area to be eradicated.

This product is toxic to fish and
birds. Keep out of any body of
water. Do not apply where runoff
is likely to occur. Do not apply
when weather conditions favor
drift from areas treated. Do not
contaminate water by cleaning of
equipment or disposal of wastes.
Apply this product only as speci-
fied on this label.

Remove pets, birds, and cover fish
aquariums before spraying.

CONTAINER DISPOSAL: Do not
reuse empty container. Destroy it
by perforating or crushing. Bury
or discard in a safe place away
from water supplies.
