In cases of heavy tick infestations on long-haired cats or dogs, dilute 1 fluid ounce of concentrate to 11 fluid ounces with water (2 tablespoons of concentrate in 1 1/2 cups water) or 12 fluid ounces (24 tablespoons) of concentrate in one gallon of water.

To control spinose ear ticks and ear mites, syringe the ears with a few drops of this dilution so that it can penetrate the wax down to the surrounding tissues. Repeat treatment once or twice at 2 to 3 day intervals as necessary. For temporary protection from mosquitoes, eye gnats, biting flies and chiggers, apply to cover the surface of the hair. Repeat treatment as necessary when insects are troublesome.

Ticks are only an occasional pest of cats. This product will control ticks on cats should they occur.

For rapid cleanout of fleas and ticks in kennels, apply this dilution in a good machine adjusted to deliver coarse droplets. Apply to the point of runoff with special attention to cracks and crevices and other insect hiding places. Bedding should be removed and sprayed thoroughly.

To control house flies, mosquitoes and gnats in kennels, apply this dilution in a good sprayer adjusted to deliver a fine mist. Use at the rate of approximately 1 ounce for 1000 cubic feet of space. Fill the enclosed area with mist wherever practical. Keep doors and windows closed for 10 minutes or more after application. Do not remain in treated areas and ventilate after treatment is completed.
