

INERT INGREDIENT: WATER, NOT MORE THAN 10%

4215

A powerful, pleasant disinfectant, deodorant, and germicide. Guaranteed to be 5 times stronger than pure Carbonic Acid when tested against typhoid at 20°C by A.O.A.C. Phenol Coefficient Method. Because of its pleasing odor, Fine Oil Disinfectant is admirably adapted for use in hotels, Banks, Office Buildings, and the home as a disinfectant and deodorant.

*Disinfectant, Deodorant, Germicide, Cleaner*

DIRECTIONS FOR USE

**FLOORS:** When in powder form, scrub floors with a solution of one part of disinfectant to 100 parts of water in the bucket.

**DISINFECTING:** Remove all filth and dirt from premises and use a solution of one part of Fine Oil Disinfectant to 100 parts of water. This mixture has been established as a disinfectant against *S. typhosa* and is used on floors, walls and woodwork.

**TOILET ROOMS, WATER CLOSETS AND URINALS:** Wash the closet and urinal bowls regularly with a solution made of 1/3 cupful of Fine Oil Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

**GARBAGE:** To aid in preventing the breeding of flies, sprinkle with the solution in the proportion of 1 1/2 ounces of Pine Oil Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

**IN A TYPHOID SICKROOM:** In the disinfecting of bed frames, room surfaces and sanitizing the hands of those attending typhoid patients, Fine Oil Disinfectant should be used in the proportion of three ounces in each gallon of water.

It is instantly soluble in water in which it forms a creamy milk white emulsion which does not separate on standing. When mixed with water in recommended dilutions, does not stain the walls, floors, or clothes, and leaves a pleasant and agreeable odor of pine.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. Avoid getting in eyes. Avoid prolonged skin contact. In case of contact with eyes, wash thoroughly with water. If eye irritation persists, get medical attention.

**FIRST AID:** If swallowed, do not induce vomiting. Give raw egg white, milk, rice gruel or corn-starch paste. Call a physician immediately.
