

DIRECTIONS FOR RINSING:

Use one tablet for each 2 gallons of water. Drop tablet or tablets into rinse tank and fill with water to the desired volume. The tablets disintegrate quickly, a final swirling agitation completes dissolution.

One tablet to each 2 gallons of water produces a rinse of approximately 200 PPM dilution.

DIRECTIONS FOR SANITIZING

TAVERNS & RESTAURANTS: First clean glassware and eating utensils thoroughly by washing in a suitable detergent solution. Then rinse for a minimum of 30 seconds in a solution containing one tablet for each 2 gallons of water. Rinse in potable water. Allow to dry without towelng.

EQUIPMENT: Use a solution of 1 tablet to each gallon of water for wiping trays, counter tables, refrigerator interiors and other equipment. This application reduces bacterial counts and odors. Rinse all equipment and food contact surfaces with potable

water before re-use.

Those restaurants and drinking establishments in the State of California should immerse dishes, glassware and other utensils for at least two minutes in a solution containing not less than 200 PPM of the active ingredient. One tablet in 2 gallons of water will provide approximately 200 PPM of the active ingredient.

DANGER: Harmful if swallowed. May cause skin irritation or eye damage. Do not get in eyes. Avoid prolonged skin contact. In case of eye contact, flush immediately with plenty of water. If eye irritation persists, get medical attention. Avoid contamination of food. Wash thoroughly after handling.

FIRST AID: If swallowed, drink promptly, a large quantity of milk, egg white or gelatin solution. Avoid alcohol. Call a physician immediately.

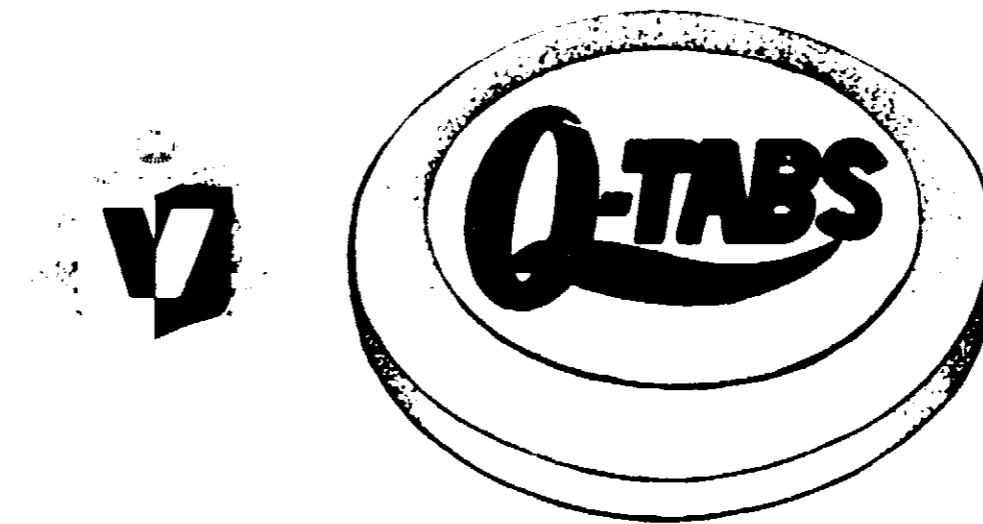

NOTE TO PHYSICIANS: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.
