

Disinfectant

PHENOL COEF.

6

A.O.A.C. METHOD

Conforms to U.S. Commercial Standard CS 69-38

ACTIVE INGREDIENTS 90%

STEAM DISTILLED PINE OIL VEGETABLE OIL SOAP

INERT INGREDIENT: WATER, NOT MORE THAN 10%

A powerful, pleasant disinfectant, deodorant, and germicide. Guaranteed to be 6 times stronger than pure Carbolic Acid when tested against *S. typhosa* (typhoid germ) by the A. O. A. C. Method.

Because of its pleasing odor, Pine Oil Disinfectant is admirably adapted for use in Hotels, Banks, Public Institutions, Office Buildings and the home, as a disinfectant and deodorant.

FOR EXTERNAL USE ONLY

DIRECTIONS FOR USE

FLOORS: When mopping or scrubbing use $1\frac{1}{2}$ ounces of Pine Oil Disinfectant to each gallon of water in the bucket.

GENERAL DISINFECTING: Remove all filth and dirt from the premises and use a solution of one part of Pine Oil Disinfectant to 120 parts of water. This mixture acts as a disinfectant against *S. typhosa*.

TOILET ROOMS, WATER CLOSETS AND URINALS: Wash the closet and urinal bowls regularly with a solution made of $\frac{1}{4}$ cupful of Pine Oil Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

GARBAGE: To aid in preventing the breeding of maggots, sprinkle with the solution in the proportion of two ounces of Pine Oil Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

In a typhoid sick-room, in the disinfecting of beds, clothes, utensils, rooms, and sanitizing the hands of those attending typhoid patients, Pine Oil Disinfectant should be used in the proportion of three ounces in each gallon of water.

CUSPIDORS: A solution of $1\frac{1}{2}$ ounces of Pine Oil Disinfectant to a gallon of water will aid in deodorizing cuspidors. Leave this mixture standing in the cuspidors. Always put Pine Oil Disinfectant in pail first and then add the water.

It is instantly soluble in water in which it forms a creamy milk-white emulsion which does not separate on standing. It is non-corrosive, and non-caustic, and when mixed with water in recommended dilutions, does not stain the walls, floors, or clothes, and leaves a pleasant and agreeable odor of Pine.

The following table will assist in obtaining accurate dilutions:

$1\frac{1}{4}$ ounces with 1 gallon	makes 1% solution
$2\frac{1}{2}$ ounces with 1 gallon	makes 2% solution
4 ounces with 1 gallon	makes 3% solution
$6\frac{1}{2}$ ounces with 1 gallon	makes 5% solution

CAUTION: KEEP OUT OF REACH OF CHILDREN

"The Truly Natural Pine Product"

PHENOL COEFF. 8 A.O. A.C. METHOD

Conforms to U.S. Commercial Standard CS 69-38

ACTIVE INGREDIENTS 90%

STEAM DISTILLED PINE OIL VEGETABLE OIL SOAP

INERT INGREDIENT: WATER NOT MORE THAN 10%

Disinfectant - Deodorant - Germicide - Cleaner

DIRECTIONS FOR USE

FLOORS: When mopping, use one ounce of Pine Oil Disinfectant to each gallon of water in the bucket.

DISINFECTING: Remove dirt and filth from the premises and use a solution of one part of Pine Oil Disinfectant to 160 parts of water. This mixture acts as a disinfectant against *S. typhosa*.

SICK ROOM: In a typhoid sick room, Pine Oil Disinfectant can be used to disinfect bed frames, utensils and non-porous hard surfaces—wash thoroughly in a solution of 2 ounces Pine Oil Disinfectant per gallon of water. To sanitize the hands and aid in the sanitary disposal of human wastes, Pine Oil Disinfectant should be used in the proportion of 2 ounces in each gallon of water.

TOILET ROOMS, WATER CLOSETS AND URINALS: Wash the closet and urinal bowls regularly with a solution made of 1/4 cupful of Pine Oil Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

GARBAGE: To aid in preventing the breeding of flies, sprinkle with the solution in the proportion of two ounces of Pine Oil Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

CUSPIDORS: A solution of two ounces of Pine Oil Disinfectant to a gallon of water will aid in deodorizing and disinfecting empty cuspidors. Wash thoroughly. Leave this mixture standing in the cuspidors.

Always put Pine Oil Disinfectant in pail first and then add the water.

It is instantly soluble in water in which it forms a creamy milk white emulsion which does not separate on standing. When mixed with water in recommended dilutions, Pine Oil Disinfectant does not stain the walls, floors, or clothes and leaves a pleasant and agreeable odor of Pine Oil Disinfectant.

CAUTION: KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED.

Antidote: Internal. Do not induce vomiting. Give any quantities with immediate effect.
