

# ODORLESS DISINFECTANT

PHENOL COEFFICIENT 20 — ~~5000~~ <sup>A. O. A. C.</sup> METHOD

*To be further diluted before using*

ACTIVE INGREDIENTS	40%
Vegetable Oil Soap	
Chloro-2-phenylphenol	
Ortho-phenylphenol	
Isopropyl Alcohol	
IN	
INGREDIENTS	60%
Water	

## DIRECTIONS FOR MIXING

One gallon of this product should be admixed with 3 gallons of water to give a standard strength disinfectant. Add the water with agitation and mix well thereafter. We advise that goggles and gloves be worn by the operator handling the mixing operation.

## DIRECTIONS FOR USE

This concentrated disinfectant should be used only after it has been cut as directed above. Thoroughly clean the premises. Then use 1 part of the diluted disinfectant in 100 parts of water or 1 $\frac{1}{4}$  ounces to a gallon.

For deodorization of garbage, bathrooms, etc., use  $\frac{1}{2}$  cup to a gallon of water for hard-to-kill odors. Let a small amount of this solution stand in the garbage container or urinal for best results.

CAUTION KEEP OUT OF REACH OF CHILDREN

*For External Use Only.*

*Poisonous If Taken Internally.*

If accidentally swallowed, give the following antidotes: milk, raw egg, mucilage, and follow with an emetic (tablespoonful of mustard in glass of warm water). Call a physician.

Avoid excessive inhalation of fumes of undiluted material, as well as contact with the skin.

Keep away from children, domestic animals and foodstuffs.
