

DIRECTIONS

FOR ROUTINE CLEANING:—Use 2 ounces of this cleaner to a pail of warm water. Mop or spread solution over area to be cleaned, allowing it to "work" for a few minutes then take up with a dry mop or squeegee. Scrubbing machines may be used satisfactorily with this same strength solution.

FOR CLEANING BACTERIOSTATICALLY:—Use one pint to a pail of warm or hot water and spread solution over area to be cleaned. Allow to "work" several minutes then agitate by scrubbing with a brush or machine to loosen accumulated grease, oil, grime, and ground-in dirt. After surface is cleaned, remove excess with squeegee or dry mop. If desired, surface may be rinsed with clean water but this is not necessary.

FOR RUG AND UPHOLSTERY SHAMPING:—Use 1 pint to 2 gallons of water, whip to a foam and use this foam in cleaning such surfaces with a sponge. Rinse with a sponge wrung out in hot water. Lay the nap down in ONE direction, then brush or vacuum when dry. ~~This will not only clean and remove musty odors but will reduce the bacteria count to relatively low levels.~~

USDA Reg. No. 421-264

BACTERIOSTATIC MULTI-PURPOSE CONCENTRATED CLEANER

WITH
HEXACHLOROPHENE*

THE MODERN BACTERIOSTATIC FLOOR CLEANER

ACTIVE INGREDIENTS: 6.81%
Sodium dodecyl benzene sulfonate
Sodium lauryl sulfate
2,2-methylene bis (3,4,6-trichlorophenol)*

INERT INGREDIENTS: 93.19%
Water
Tetra sodium pyrophosphate
Sodium carbonate,
Aromatic oils
Sodium hydroxide

* (Hexachlorophene (G-11, Trademark Sindar Corp.)

Cleans! Deodorizes! All in One Operation

BY FOLLOWING DILUTION DIRECTIONS, FLOORS AND OTHER SURFACES ARE CLEANED BACTERIOSTATICALLY AND DEODORIZED IN THE SAME OPERATION—MAKING FOR ECONOMY IN MONEY, TIME AND LABOR.

CAUTION: KEEP OUT OF REACH OF CHILDREN
(See side panel for further cautions)

BACTERIOSTATIC ACTION

This cleaner contains Hexachlorophene, to give it bacteriostatic as well as cleaning properties. If you follow the directions given above your floor will be deodorized, and cleaned at the same time.

DEODORIZING ACTION

Germs multiplying in debris build up bad odors. By bacteriostatically cleaning your floors with this product the source of many obnoxious odors is removed and the room remains fragrant and clean-scented for hours afterwards. Here's cleaning at it's most efficient—deodorized cleaning.

CAUTION: Avoid contamination of feed and foodstuffs. Not to be used for terminal disinfecting processes or as a replacement for disinfecting operations.
