

**ACCEPTED**  
 MAY 05 1989

Under the Federal Insecticide,  
 Fungicide, and Rodenticide Act,  
 as amended, for the pesticide  
 registered under 421-43.6  
 EPA Reg. No.

This product contains the toxic inert Rhodamine B

A Product of *James Curley & Sons Inc.* ST. LOUIS, MO

Directions for Use  
**GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.  
 This concentrate is a general use disinfectant, cleaner, sanitizer, fungicide, microstatic and deodorizer which is  
 effective at water up to 400 ppm hardness in the presence of 5% sodium carbonate.

Apply this concentrate to walls, floors and other hard, non-porous surfaces but not on fabric, carpets,  
 counter-tops, wood, tile, porcelain and appliances with a clean, mild detergent. Always allow to dry to  
 thoroughly wet surfaces. For heavily soiled areas a preliminary cleaning is required. Prepare a fresh solution daily  
 or when the solution becomes visibly dirty.

**Directions:** To disinfect hard, non-porous surfaces in hospitals add 2 oz per gallon of water. Treated surfaces  
 must remain wet for 10 minutes. To disinfect other hard, non-porous surfaces add 1 oz per gallon of water. To  
 1/2 oz per gallon of water. This concentration is also effective against mold, mildew, fungi, bacteria and non-  
 medical infections.

**Sanitizing:** To sanitize all hard, non-porous, non-food contact surfaces add 1/2 oz per 2 1/2 gallons of water.  
 Treated surfaces must remain wet for 10 minutes.

**2 oz per gallon use level:** The broad spectrum activity of this concentrate has been evaluated and found to be  
 effective against the following organisms by the AOAC Use-Dilution Test:

- |                        |                                |
|------------------------|--------------------------------|
| Neisseria meningitidis | [Ineffective for disinfection] |
| Staphylococcus aureus  | Streptococcus faecalis         |
| Salmonella typhimurium | Shigella dysenteriae           |
| Clostridium botulinum  | Brevibacterium amstelredamense |
| Streptococcus faecalis | Salmonella typhi               |
| Klebsiella pneumoniae  | Serratia marcescens            |

**For outdoor industrial and non-medical application:** Add 1/2 oz per gallon of water. This concentrate contains  
 sodium carbonate and germinicide when present. It is effective against Streptococcus aureus, Salmonella  
 (Typhimurium), Escherichia coli and Serratia marcescens. The same AOAC tests used to compare performance of  
 hospitals were used.

**AOAC Fungicide Test:** This concentrate is an effective fungicide against the moldy microorganisms (the  
 growth of mold fungus) when used on surfaces in areas such as toilet rooms, drinking rooms, shower and bath  
 areas, etc. in facilities.

**Mold and Mildew Control:** At 1/2 oz per gallon, this concentrate will effectively inhibit the growth of mold and mildew  
 and the odors caused by them when applied to hard, non-porous surfaces. Use indicated in general use and  
 hospital areas to dry on surfaces and help in other routine growth returns.

**Microstatic Performance:** At 1/2 oz per gallon use level, this concentrate was evaluated and found to  
 be effective against the organisms A1, B1 and H1, H2, H3, H4, H5, H6, H7, H8, H9, H10, H11, H12, H13, H14, H15, H16, H17, H18, H19, H20  
 on hard non-porous, non-medical environmental surfaces.

**Sanitizing Non-Food Contact Surfaces (such as floors, walls, table etc.):** At 1/2 oz per 2 1/2 gallon  
 use level, the concentrate is an effective sanitizer against Staphylococcus aureus and Klebsiella  
 pneumoniae on hard porous and non-porous environmental surfaces.
