SCARRY'S

BLITZ INSECTICIDE A HOUSEHOLD INSECT SPRAY

ACTIVE INGREDIENTS: 100%

Petroleum Distillate
Piperonyl Butoxide Technical
Pyrethrins
Consists of Chloroform, butylalcohol, di-propylpiperonyl ether and related compounds.
Contains Piperonyl Butoxide in all the active stages of:
Roaches, Silverfish, Spiders, Flies, Mosquitoes, Moths, Gnats, Wasps, Hornets, Ants, Fleas, Ticks, Clothes Moths, Carpet Beetles and Bedbugs.

DIRECTIONS FOR USE:

FLYING INSECTS - Flies, Mosquitoes, Moths, Gnats, Wasps and Hornets - Use a sprayer designed to deliver a fine mist, directing the spray toward the upper and center portions of the enclosure, as well as into corners, behind curtains and draperies, and under furniture. Walk around or through the room during application for insure adequate distribution of the spray mist. Fog the room thoroughly using about 2 ounces (4 tablespoons) for each 100 cubic feet of space. Wherever practicable, keep windows and doors closed for 30 minutes after treatment.

CRAWLING INSECTS - Apply spray liberally to all places of harborage, breeding and concealment, with particular attention to locations commonly frequented by the pests to be controlled.

ROACHES SILVER-FISH, CRICKETS, SPIDERS, SCORPIONS - Spray exposed insects and treat thoroughly all cracks, crevices and dark corners behind cabinets, sinks, furniture, baseboards and shelves, around drains and pipes, and similar hiding places. As these insects are commonly found in these applications will effectively and rapidly control severe infestations and repeated treatments as necessitated. Will prevent and reduce reinfestation.

ANTS - To most effectively control, locate ant trails and places of entrance, and trace to nest or breeding place. Spray the nests and trails thoroughly and treat infested baseboards, shelves and cabinets frequently at intervals until ants are completely exterminated.

FABRIC PESTS - CLOTHES MOTHS AND CARPET BEETLES - Remove moth and other woollens from infested storages and brush them thoroughly, with particular attention to lapels, seams and pleats. If any pest-like infested garments and fabrics are to be saved, seal in airtight plastic bags. Apply spray liberally to all surfaces of empty closets, chests, trunks and other storage spaces, directing the mist into all cracks and crevices. Use approximately 1/2 ounce of this insecticide spray for each 10 square feet of surface and keep storage areas closed for 30 minutes after application. After infested clothing, blankets, fabrics and rugs have been brushed and dried, store articles as normally desired. Infested articles may be treated with spray in all the active stages of moths and carpet beetles. Hold the spray nozzle at least 3 feet away from the fabric and apply lightly to avoid the possibility of staining. Spray in dry storage closets, attics, trunks, suitcases, and under and over the bed. In the case of bedbugs, spray the bed, mattress, and springs thoroughly and liberally, as well as to both sides, spraying thoroughly all furniture, drapes, curtains, and springs liberally. Repeat treatments as needed.

FLEAS AND TICKS - Fleas, fleas, ticks and other insects may be effectively controlled by liberally applying spray to all baseboards, carpets and rugs. Fleas will keep reproducing for many days after the first application. With proper care, fleas, ticks and other insects where present in stages of the life cycle and develop. Fleas, ticks and fleas are also killed with the aid of the insecticide. The insecticide will kill the eggs of the fleas, ticks and other insects and the eggs of the insects should be repeated every 2 to 4 weeks. As the spray is a butoxide, use to be treated with the insecticide. Use to be treated with the insecticide.

PRECAUTION - This insecticide is a household insecticide and should not be applied to the open flame. It should not be sprayed on electrical wires, switches, or other electrical equipment.

HARMFUL IF SWALLOWED. CONTAINS PIPERONYL BUTOXIDE.

CAUTION

KEEP OUT OF REACH OF CHILDREN
