ANT-KIL KILLS ANTS—3 WAYS

1. IF THEY EAT IT...
2. IF THEY CRAWL IN IT...
3. IF THEY BREATHE IT...

ANT-KIL with 10% Chlordane is an Agricultural Insecticide intended for killing Ants only and is not recommended for use as a garden insecticide.

DIRECTIONS

TO KILL RED or CUT ANTS Sprinkle Durham's Ant-Kil thickly around openings of the Ant Hill, in a solid band about four or five inches wide. Be sure each opening of the den is encircled and should new openings appear after treatment repeat the application as directed above.

TO HELP CONTROL BLACK ARGENTINE (Or Sugar) ANTS Sprinkle Durham's Ant-Kil in the Trails of the Ants outside of the house and dust Ant-Kil in the Ant Colonys that are visible outside of houses.

CAUTION

ANT-KIL with 10% Chlordane is toxic and may be absorbed thru the skin by prolonged exposure. Avoid inhaling the dust. At first signs of nasal irritation seek fresh air. For Skin irritation wash exposed surfaces with soap and water. Do not contaminate foods uffs. Keep out of the reach of Children. Ant-Kil is not recommended for use on pets or humans.
