DIRECTIONS FOR USE

TO KILL RED ANTS or CUT ANTS In dens or hills, in or near barns or Out-houses: Mix 4 tablespoons (2 ounces) of 40% wettable Chlordane powder in a gallon of water and pour into dens. Large dens with several openings may require up to 5 gallons per treatment. Do not treat dens in croplands. Do not use in pasture land.

TO KILL SMALL BLACK Household ANTS around or near houses dissolve 2 ounces (or 4 tablespoons) of 40% Wettable Chlordane Powder in a gallon of water and pour into the dens and wet trails where they appear near foundations, also treat window sills and door frames if ants are entering them. Repeat applications as needed for control. Area treatments to control these ants in lawns should be made before lawns are seeded and at a rate of 4 tablespoons of 40% Wettable Chlordane dissolved in sufficient water to give even coverage on 1000 square feet.

FOR HOUSEHOLD USE. To control Roaches, Water Bugs dilute 1 pound of 40% Wettable Chlordane Powder in 2½ gallons of water and use as a spot treatment (not as a general spray) or in cracks and crevices which may harbor such insect pests. Do not use on surfaces which may be damaged by water. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

CAUTION: This product is toxic to fish and wildlife. Keep out of lakes and streams. Do not apply to any area not specified on the label.

CAUTION: Birds feeding on treated areas may be killed. Do not apply where run-off is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes.

CAUTION: Harmful if swallowed. Contact with the skin can cause toxic symptoms. Avoid contamination of feed or food-stuffs. In case of contact with the skin wash with soap and water. Do not use on feed or storage to be fed dairy animals or those to be finished for slaughter. Keep children and pets off treated areas until this material has been washed into the soil and area is completely dry. Avoid breathing of dust or spray mist.

EPA REGISTRATION NO. 430-47

449-79

DIRECTIONS

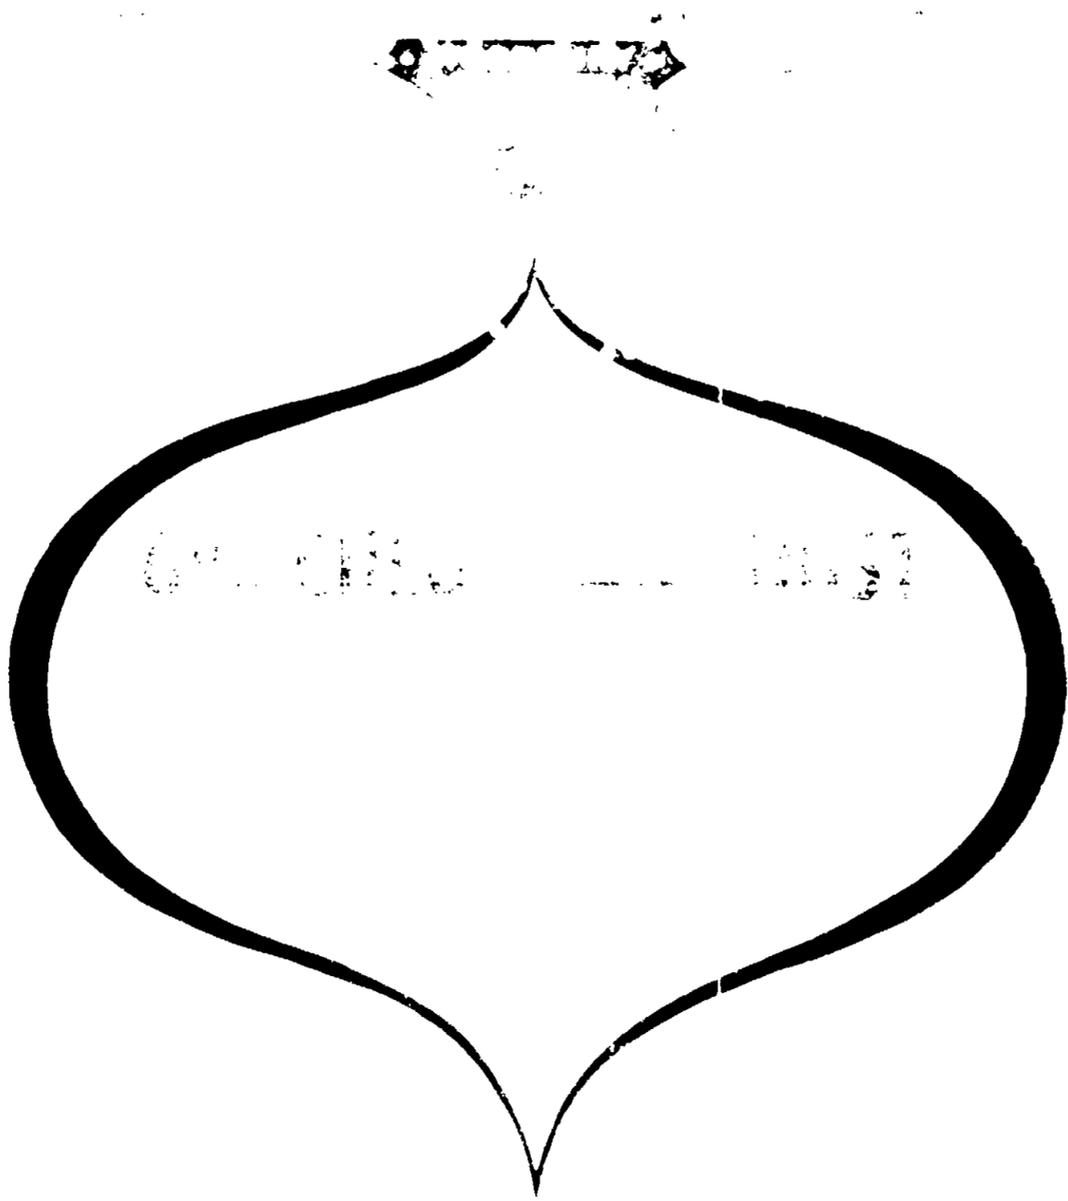

Chlor-dane is powerful and effective in controlling insects all ways — by contact or ingestion.

DIRECTIONS

LAWN. To control ants, chinch bugs and chiggers dust lightly at the rate of 1 pound to 600 to 700 sq. ft. of area. For white grubs, Japanese beetle grubs and sod webworm (lawn moth) apply at the rate of 1 pound to 600 sq. ft. Water with a hose to get into soil for insect feeding and egg laying. Birds feeding on treated areas will be harmed.

GARDEN SOIL. To control wire worms, white grubs, Japanese beetle grubs, root maggots, radishes, onions and storage work etc. top 2 or 3 inches of soil with 1/2 pound per 100 sq. ft. as a preplant soil treatment. Apply at 60° to 70° F.

GARDEN. To control cutworms, earwigs, meadow crickets, soil grubs, millipedes and leaf cutting ants on tomatoes, cucumbers, peas and beans, dust on the ground around the plant at the base of a row. Repeat application 10 days after first application. Apply at 60° to 70° F.

DIRECTIONS

FOLIAGE DUST: To control grasshopper thrips and plant bugs on flowers, shrubs and other ornamentals, dust directly on the plant and insect. Coverage of both upper and lower leaf surfaces is necessary for effective control. Repeat as necessary to prevent damage.

CAUTION

THIS MATERIAL IF TAKEN INTERNALLY CAN CAUSE TOXIC SYMPTOMS. AVOID INHALATION OF DUST AND AVOID CONTAMINATION OF FOODSTUFFS OR COOKING UTENSILS.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

This product will kill fish and wild life. Do not use in lakes, ponds and streams. Do not use in any manner that results in runoff. Birds and wild life that drink water may be killed. Do not spray where birds or animals are present. Do not use in water by direct application. Do not dispose of waste in waterways.

NON WARRANTY

This product is sold as a general purpose insecticide. It is not intended for use as a fumigant, disinfectant, or sanitizer. It is not a sterilant or a preservative. It is not a defoliant or a plant growth regulator. It is not a herbicide, rodenticide, or molluscicide. It is not a molluscicide.
