PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
DANGER
Fatal hazard to humans if inhaled. Irritation to eyes, nose, throat, and skin. May cause dizziness and headache. Avoid contact with skin and eyes. Wash thoroughly with soap and water after use.
Environmental Hazards
Noxifish is highly toxic to fish. Do not use in streams, rivers, or other bodies of water where fish are present. Do not use in areas where fish are present. Do not use in areas where fish are present.

GENERAL INFORMATION
Noxifish is a highly toxic fish poison. It is used to control fish populations in lakes, ponds, reservoirs, and streams. It is highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails. Noxifish is a liquid emulsifiable concentrate that is easy to mix and apply. It is highly effective and fast acting. It is also highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails.

FOR USE IN PONDS, LAKES AND RESERVOIRS
Noxifish is used to control fish populations in lakes, ponds, reservoirs, and streams. It is highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails. Noxifish is a liquid emulsifiable concentrate that is easy to mix and apply. It is highly effective and fast acting. It is also highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails.

FOR USE IN STREAMS AND RIVERS
Noxifish is used to control fish populations in streams and rivers. It is highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails. Noxifish is a liquid emulsifiable concentrate that is easy to mix and apply. It is highly effective and fast acting. It is also highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails.

4. Exposure Route
The primary route of exposure to Noxifish is through the respiratory tract. Inhalation of dust or mist from the application of Noxifish can cause irritation of the respiratory tract. Noxifish is also highly toxic to fish and other aquatic organisms. It is highly effective against all species of fish, including carp, bass, and bluegill. It is also effective against other aquatic organisms, including crayfish and snails.
