

ACCEPTED
 JUN 7 1978
 Under the Federal Insecticide -
 Fungicide, and Rodenticide Act
 as amended for the pesticide
 registered under
 EPA Reg. No. 432-454

NET WT. _____

**YOUR BRAND
 SBP-1382® AQUEOUS PRESSURIZED SPRAY
 INSECTICIDE 0.35 FOR HOUSE AND GARDEN**

ACTIVE INGREDIENTS:

* †(5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl)cyclopropane carboxylate 0.350% w/w
 Related compounds 0.048%

INERT INGREDIENTS: 99.602%
 100.000%

* Cis/trans Isomers ratio: max. 30% (±) cis and min. 70% (±) trans.
 † U.S. Patent No. 3,465,007

SHAKE WELL BEFORE USING

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Avoid contamination of feed and food-stuffs. Remove birds, pets, and cover aquariums before spraying. Do not use on edible crops.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

KILLS: Mosquitoes, gnats, houseflies, biting flies, roaches, aphids (plant lice), leafhoppers, spittlebugs, plant bugs, spiders, Japanese beetles, wasps, ants.

PENICK Penick Corporation

1050 Wall Street West, Lyndhurst, NJ 07071 USA

DIRECTIONS FOR USE

Shake well before each use. Remove protective cap. Aim spray opening away from person. Push button to spray.

INDOORS - FOR HOUSEFLIES, MOSQUITOES, AND GNATS:

Close all doors and windows. Point nozzle upward, direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

INDOORS - FOR CRAWLING INSECTS:

Roaches, earwigs, grain mites, sawbugs, spiders and centipedes: Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insects where possible. Repeat as necessary.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

INDOORS - FOR USE ON HOUSE PLANTS:

Spray infested African violets, philodendron, geraniums, begonias, coleus for control of aphids, spider mites and adult whiteflies. Repeat as necessary.

OUTDOORS - TO REDUCE ANNOYANCE FROM FLYING INSECTS:

Reduce mosquitoes, gnats (midges), houseflies, biting flies and flying moths (mites) by spraying their resting areas. Follow directions listed above. Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion at the rate of 100 to 1 second per cubic yard of space while moving away from the treated area. To reduce annoyance from these flying insects, treat when possible and adhere to a regular spraying schedule when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

OUTDOORS - TO CONTROL ORNAMENTAL PLANT PESTS:

Spray aphids, spider mites, adult whiteflies, leafhoppers, plant bugs, spittlebugs, Japanese beetles, minute webworm larvae, and oakworm larvae. Direct spray on insects by holding the container 12 to 18 inches from the infested plants. Spray in short bursts of one to three seconds or spray at the rate of one linear foot of growth per second. Direct spray to all sides, covering foliage until slightly moist. Avoid heavy wetting. Repeat applications as necessary. USE WITH CAUTION on the tender foliage of Flowering Quince, Juniper, Cypress, Mulberry, Ash, Coleonaris, Rose, Camellia, Aralia, Pyracantha and Cornelianus, as certain varieties have shown some leaf burning.

When infested, spray smaller evergreens, deciduous trees and shrubs as rhododendrons, pines, spruces, hemlocks, yews, abies, junipers, holly, podocarpus, boxwood, laurel, lilac, spirea, dogwood, palm, yucca, mimosa, fig, viburnum, oaks, maples, locusts, forsythia, althea and roses for control of aphids, and other pests listed above. Also spray infested flowering plants as peonies, iris, zinnia, snapdragons, ageratum, chrysanthemums, nasturtium, daisy, geraniums, marigolds, daphne, fatsyhedera, ivy, tobacco, queen sago, broadleaf acacia for the same listed pests.

OUTDOORS - TO CONTROL NUISANCE PESTS ON OR ENTERING BUILDINGS:

WASPS: Applications should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

EARTHWIGS: Spray directly on earwigs in crevices and other hiding places on porches, patio floors and doorway entrances. Repeat application as necessary.
