DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

LIST OF INSECTS CONTROLLED

Aphids, leafhoppers, exposed Thrips, adult Japanese Beetle, and Mites such as European Red Mite, Two-spotted Spider Mites, and Clover Mite on FLOWERS, SHADE TREES, and ORNAMENTALS.

Mealy Bug and Whitefly on potted and greenhouse plants. Rose Chafer, Midge, and Slug on Roses.

FOLIAR SPRAY: Mix 1 tablespoon (1/2 fl.oz.) of GARDEN SPRAY in each gallon of water for a general insect spray on FLOWERS, SHADES TREES, and ORNAMENTALS around Homes, Estates, Parks and Institutions. When insects appear, direct spray to hit as many as possible and to thoroughly cover all plant surfaces, particularly the undersides of leaves. Repeat at weekly intervals or as necessary.

PATIO SPRAY: To reduce the annoyance of mosquitoes and gnats on PATIOS around the home grounds and in other recreational areas, apply as a solution of six tablespoons (three fl. oz.) of GARDEN SPRAY in each gallon of water. Use a fine mist to penetrate hiding and resting places such as grass, shrubs, and ornamentals. Treat as large an area as possible surrounding the patio or grounds to be kept mosquito or gnat free. Repeat application as necessary. Apply at the rate of two pints of GARDEN SPRAY per acre. Do not spray patio surfaces.

APHICIDE and SPREADER-STICKER: PENICK'S GARDEN SPRAY may be used in combination with Methoxychlor, Carbaryl or Carbamate-Fungicides as an aphicide and a spreader-sticker. Tank mix 1 tablespoon (1/2 fl.oz.) of GARDEN SPRAY per gallon of water with the normal concentrations of the pesticides. AGITATE WHILE USING.

STORAGE AND DISPOSAL

14

Do not store near heat or open flame. Do not reuse empty container. Wrap container and put in trash collection.
