

NOXFIRE® INSECTICIDE with ROTENONE
EC 5% Formula II
EPA Reg. No. 432-677

DIRECTIONS FOR USE (continued)

FIRE ANT DRENCH:

For use in lawns, gardens, grounds around buildings, fields, agricultural land, wasteland, golf courses, recreational areas, campgrounds.

For control of an individual fire ant mound measuring 2-9 inches (5-25 cm) high and 5-21 inches (12-60 cm) in diameter, mix 1 tablespoon (14.6 ml) of Rotenone 5% EC in 2 gallons of water (7.57 L) and thoroughly agitate until completely mixed.

Apply this mixture to the undisturbed mound by first using some on the dome to soften the crust. Then use some to completely soak the perimeter. The remainder should be poured from a height of about 3 ft (1m) so as to break into the dome and allow the mixture to flow into the underground ant tunnels. Repeat in 7-10 days or as necessary. For larger mounds, apply greater volumes of diluted material.
