170 Beaver Brook Road  
Lincoln Park, NJ 07035  
└

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) and sec. 4 when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase, "EPA Registration No.432-749" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

*RFM*

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This aerosol is designed for use in adjustable automatic activators set to dispense a 100 mg. dose every 15 minutes

Use one aerosol in an automatic activator for each 6,000 cubic feet of room space to be treated. Install the activator on a wall approximately 7 feet from the floor. Do not install directly over any food handling or dispensing areas. Never locate automatic activators in drafty hallways or where air currents are least noticeable. The rate of air change, shape of space to be treated, humidity and temperature affect insect activity and insect control. One unit per 6,000 cubic feet should be considered as an average ratio. Adjust the ratio depending upon the conditions under which the automatic activator is used.

When properly located, the effectiveness of the SBP-1382 formula will be noticeable within one hour after the activator is started. After one hour of operation, enough insecticide is suspended in the air to kill a substantial proportion of the house flies, mosquitoes and gnats present. Aerosol must not be used for more than 24 hours. SBP-1382 formula may be used one hour after the plant has stopped operations and turned off one hour prior to the plant's start of operation.

All exposed edible products and their packaging material must be removed, tightly covered and stored in a closed container before spraying.

All exposed utensils and food preparation areas must be washed with potable water and a suitable cleaning agent after the area is treated.

The 12 ounce aerosol contains enough material to operate 825 hours, or 66 days on a 12 hour basis. It is suggested the container be checked every 2 months if used on a 12 hour basis.

## SBP-1382® 1% for TIMED DISPENSER

Authorized by USDA for use in edible product areas of official establishments operating under the Meat, Poultry, Shell Egg Grading and Egg Products Inspection Programs.

#### ACTIVE INGREDIENTS:

\*Neemethrin [5-(phenylmethyl)-1,3,4-dihydro-2H-pyridin-2-dimethyl-3-(2-methyl-1-propenyl)cyclopropane]

#### INERT INGREDIENTS:

99.002  
100.00%w/w

\*Cis/trans isomers ratio: max. 30% (cis) and min. 70% (trans).  
\*Roussel Bio's SBP-1382® brand of neemethrin insecticide.
