#### DeltaGard G Insecticide Granule EPA Reg. No. 432-836 30 September 2014

#### Section II Explanation – Continued

With this application Bayer CropScience is notifying the agency of the following label revisions;

- 1. On page 1, we added a bracketed (ie. optional) image placeholder where we intend to include image(s) of the named pests (Ant and Wasp). As these pests are controlled by the product, then the statement cannot be considered false and misleading, does not substitute for or conflict with label text and should be allowable via Notification as defined in PR Notice 98-10 (II) (H).
- 2. Also on page 1, we consolidated the already approved Medical and Transportation Emergency and Product Use Information contact sentences into a single section just before the First Aid Section.
- 3. On page 3 we revised the heading "GENERAL INFORMATION" to read "PRODUCT INFORMATION" as per state lead agency preference.
- 4. On page 4, we revised the heading "Container Disposal" to read "Container Handling" per agency preference.

No other changes have been made from the most recent stamped label approved on 01/06/2011.

#### CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

#### **ENVIRONMENTAL HAZARDS**

This product is extremely toxic to fish and aquatic invertebrates. Use with care when applying in areas adjacent to any body of water. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### **APPLICATION RESTRICTIONS**

Apply this product as prescribed on this label.

To avoid potential residue on concrete surfaces (patios, sidewalks, driveways, pavers, or similar material), it is recommended that granules applied to these surfaces be removed.

In New York State, product may not be applied to turf within 100 feet of a coastal marsh, or stream that drains directly into a coastal marsh. For control of turf insects other than ticks in New York State, a second application may be made after two weeks if target insect activity persists.

Calibration instructions are included in the Owner's Manual that was provided by the equipment manufacturer at the time of purchase.

#### DELTAGARD G Insecticide Granule Recommended Spreader Settings

Note: Calibration chart for spreaders will be inserted at time of printing.

TICK CONTROL (OUTDOORS): For control of Ticks (including, but not limited to Bear Tick, Black-legged Tick, Brown Dog Tick, Deer Tick, Lone Star Tick, Western Black-legged Tick, Wood Tick), a regular treatment program should be followed. Treat once a month as directed above when pests first appear in late spring (May-June) and continue until late summer (August-September) into the fall.

SOD WEBWORMS: If Lawn Moths (Sod Webworm Adults) are noticed in large numbers at dusk, or at first sign of damage to lawn, treat entire lawn uniformly.

**PERIMETER TREATMENT:** To help prevent infestation of buildings by **Ants, Boxelder Bugs, Brown Dog Ticks, Centipedes, Cockroaches, Clover Mites, Crickets, Field Crickets, Fire Ants, Sowbugs, Spiders, Springtails (Collembola), Termites,** and **Ticks;** treat a band 5 to 10 feet wide around and adjacent to the building where pests are active and may find entrance. Treat at a rate of 1 to 1 1/2 pounds per 500 square feet or 2 to 3 pounds per 1,000 square feet.

For termites, the purpose of such applications of DELTAGARD G Insecticide Granule is to kill workers or winged reproductive forms which may be present at the time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement.

SPOT TREATMENT: To control Ants, including Acrobat, Argentine, Big Headed, Cornfield, Harvester, Leafcutter, Little Black, Pavement and Pyramid Ants; if possible, locate and treat nest first. Product should be applied to thoroughly cover the nest (1 to 2 teaspoons) and sprinkled with sufficient water to dissolve granules. In addition to treating ant nests or mounds, entry points of buildings and the soil surface along the perimeter of the building should be treated.

DIGGER WASPS: Apply 1 to 2 teaspoons of granules in and around each individual ground nest opening. Make the application at dusk when wasps are not active.

**IMPORTED FIRE ANTS:** Apply two tablespoons over each 8" to 10" diameter mound and up to 2 feet around to prevent escape of the queen. Immediately after application, water the granules into the soil gently with a light sprinkling can to avoid disturbing the colony. Use at least 1 gallon of water per mound. Apply in cool weather during the spring and fall (65°-80°F), or in early morning or late evening for best results. Treat new mounds as they appear, but no more than once every two weeks. If possible, make applications after a recent rainfall.

To control Ants, Fire Ants, Armyworms, Centipedes, Cockroaches, Crickets, Cutworms, Grasshoppers, Pillbugs, Sowbugs, Spiders, Springtails, and Ticks; apply granules evenly over soil within the beds, interiorscapes, and under shrubbery. Use the same dosage recommended for control of these pests in lawns. For optimum results, irrigate with an adequate quantity of water to thoroughly moisten treated area and dissolve the insecticide granule. Do not use on or around fruit and nut trees, vegetable plants or around any plants used for food.
