1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)		
Name Sharon M. Johnston	Title Manager, Registrations	Telephone No. (Include Area Code) (201) 307-3363
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.		Date Application Received (Stamped)
2. Signature 	3. Title Manager, Registrations	
4. Typed Name Sharon M. Johnston	5. Date April 28, 1998	

## SUPPLEMENTAL LABELING

**DELTAGARD™ GC GRANULAR INSECTICIDE**  
EPA REG. NO. 432-837**Recommendations**  
**For Use of DeltaGard GC Granular Insecticide**  
**On Creeping Bentgrass and Other Closely Mowed,**  
**High Maintenance Turf.**

DeltaGard GC Granular Insecticide contains 0.1% Deltamethrin pyrethroid on an ammonium sulfate carrier. When applied at the recommended rate of 2 to 3 lb of product per 1000 ft<sup>2</sup> to control insects on turfgrass sites, this product will supply 0.4 to 0.6 lb soluble nitrogen per 1000 ft<sup>2</sup> from the ammonium sulfate carrier.

To reduce the potential of foliar burn to creeping bentgrass and other closely mowed, high maintenance turf, utilize the following precautions:

- After applying this product, irrigate immediately to reduce the potential of turf injury. This is particularly important if the application has been made to wet turfgrass foliage. Irrigation after application with adequate amounts of water completely dissolves the granules and reduces the potential of foliar burn. Allowing this product to dry on the foliage increases the potential for turf injury and is not advised.
- Application to creeping bentgrass when air temperatures are 80 °F or greater increases the potential for foliar burn and is not advised.
- Application of this product to turfgrasses under conditions in which ammonium sulfate alone would cause foliar burn (such as when the foliage is wet, when the temperatures are high, when the relative humidity is low, or when the product is not watered-in) is not advised.
