Subject: Notification Revising Label to Correct the Percent of Active Ingredient in the
Ingredient Statement
DeltaDust® Manufacturing Concentrate
EPA Reg. No. 432-876
Your Submission Dated March 20, 2000

Dear Mr. Conte:

It has come to our attention that on March 20, 2000, Aventis submitted a revised label for the subject product by notification to correct the amount of active ingredient, deltamethrin, in the ingredient statement. Labeling changes of this nature are not permitted by notification; they must be made by amendment. In the future, when making changes to a product's ingredient statement, you must submit an application for amendment with 5 copies of draft labeling for our review.

We have reviewed the revised labeling, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, and determined that it is acceptable subject to the comments listed below. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

1. The First Aid statements must be updated in accordance with the Agency's latest guidance in PR Notice 2001-1. Please submit an application for amendment incorporating these updated statements. Your application should be submitted with sufficient time for EPA review before the October 1, 2003 deadline given in PR Notice 2001-1.
