FIRST AID

IF SWALLOWED	Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING	-Take off contaminated clothing -Rinse skin immediately with plenty of water for 15-20 minutes. -Call a poison control center or doctor for treatment advice.
IF IN EYES	-Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. -Call a poison control center or doctor for treatment advice.
IF INHALED	-Move person to fresh air -if person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. -Call a poison control center or doctor for further treatment advice.

HAVE THE PRODUCT CONTAINER OR LABEL WITH YOU WHEN CALLING A POISON CONTROL CENTER OR DOCTOR OR GOING FOR TREATMENT.

NOTE TO PHYSICIAN

There is no specific antidote. All treatments should be based on observed signs and symptoms of distress in the patient. Overexposure to materials other than this product may have occurred.

BAYER ENVIRONMENTAL SCIENCE

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if absorbed through skin. Harmful if inhaled. Harmful if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear long sleeved shirt and long-pants, socks and gloves. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds, fish, and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Care must be taken to avoid runoff. Do not contaminate water by cleaning equipment or disposal of wastes. Do not contaminate water when disposing of equipment washwaters.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store unused boxes out of reach of children and animals. Store away from heat or sunlight.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Used rodent boxes (in use for three months or more) should be disposed of in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The Maxforce Tick Management System is used for the control of ticks which may carry Lyme disease.

General

This product consists of three components: 1) a child-resistant rodent bait box, 2) nontoxic bait blocks or food odor attractants, and 3) an applicator wick impregnated with 0.70% fipronil which are all prepacked and ready to use. Rodents (mice, voles and chipmunks) that enter the box to feed or investigate the odor attractant are treated with fipronil as they come in contact with the applicator wick. This tick control method interrupts the transmission cycle of Lyme disease. Boxes are placed in locations in early spring for three months, then replaced with new boxes for an additional three months.

How and Where to Apply

Most cases of Lyme disease are due to tick bites acquired on homeowners' properties. Maxforce Tick Management System rodent boxes are placed in areas of yards inhabited by rodents, especially white-footed deer mice and chipmunks. The number of boxes and pattern of placement will average 10 per property. In general, rodents are most abundant in woodlots and along the edge of natural vegetation and maintained lawn. Boxes are placed 10 meters (30 feet) apart along the edge of maintained landscaping and woodlots and/or brush. Stonewalls provide excellent harborage for rodents and boxes should be placed on the ground along their bases at 10 meter intervals. After inspecting a property and deciding the pattern and placement sites, putting the boxes into operation is quick and easy. Using a hammer or other suitable device affix the boxes into the ground.

When to Apply

In order to achieve the greatest level of tick control, Maxforce Tick Management System rodent boxes should be set out in mid-April/May and maintained until the end of September. Nymphs seek animals to feed upon from April through July and larvae from June through September. Killing nymphs in the spring reduces the number of adults that emerge in the fall. Killing larvae in the summer and fall reduce the number of nymphs that emerge the following spring.

Additional Tips:

- * Set boxes at least two feet back from the edge of maintained lawns, driveways and streets to prevent damage by mowing equipment and vehicles.
- * Impervious rubber gloves must be worn when working with the Maxforce Tick Management System.
- * Trim back new growth on vegetation in the immediate vicinity of boxes so that their locations remain unobscured, or mark each box placed in dense vegetation with a visual aid.
- * Keep records for numbers and locations of bait boxes set out, dates of maintenance and amounts of materials used for each property.
- * Show the property owner where boxes are placed.
- * At the end of the treatment period, Maxforce Tick Management System boxes should be gathered and disposed of according to Federal, State and Local regulations using rubber disposable gloves.

RE: Submission of Notification for Alternate Brand Name (ABN)
Select TCS Rodent Station
EPA Reg. No. 432-1248

Dear Mr. Johnson:

Bayer Environmental Science is submitting the notification of Alternate Brand Name for the product referenced above. Specifically we enclose copies of the following:

1. EPA Form 8570-1 Application for Registration-hard copy and electronic version (OPP Identifier No. 270646).
2. Four (4) copies of revised product labeling
3. Certification per PR Notice 98-10

Please contact me directly via phone or email should there be any additional questions regarding this information (201-307-6884 or Adrian.Krygsman@BayerCropScience.com). Thank you.

Sincerely,

Adrian Krygsman
