EPA Reg. No. 432-1252 Maxforce Professional Insect Control Ant Killer Bait Stations 1 of 3

TEAR HERE TO OPEN 

MAXFORCE

PROFESSIONAL INSECT CONTROL® ANT KILLER BAIT STATIONS

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

INSPECTABLE

DO NOT ALLOW CHILDREN OR PETS TO PLAY WITH THE BAIT STATIONS.

CAUTION

(See [Directions and] Precautions on Side -or- Back Panel)

ACTIVE INGREDIENT: Hydramethylnon[†] [Tetrahydro-5,5-dimethyl-2(1H)-pyrimidinone, (3-(4-(trifluoromethyl)phenyl)-1-(2-(4-(trifluoromethyl)phenyl)ethenyl)-2-propenylidene)hydrazone] 1.0%
OTHER INGREDIENTS:99.0%
[†CAS No. 67485-29-4]

Effective Against:
Pharaoh Ants
Odorous House Ants
Black Carpenter Ants
Florida Carpenter Ants
Argentine Ants
Carpenter Ants
Red Imported Fire Ants
Pavement Ants
Crazy Ants
Cornfield Ants
Acrobat Ants
Thief Ants

MAXFORCE

PROFESSIONAL INSECT CONTROL® ANT KILLER BAIT STATIONS

ANT KILLER BAIT STATIONS

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

ACTIVE INGREDIENT:

Hydramethylnon: tetrahydro-5, 5-dimethyl-2(1H)-pyrimidinone, (3-(4-(trifluoromethyl) phenyl)-1-(2-(4-(trifluoromethyl) phenyl) ethenyl)-2-propenylidene) hydrazone1.00%

Other Ingredients:99.00%

TOTAL:100.00%

CONTAINS: 24 Child-Resistant Bait Stations

CAUTION: KEEP OUT OF REACH OF CHILDREN

FIRST AID

IF ON SKIN: -Take off contaminated clothing.
-Rinse skin immediately with plenty of water for 15-20 minutes.
-Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-334-7577 for emergency.

Do not use residual sprays with or near the MAXFORCE® bait stations, as the worker ants must remain alive to carry the bait back to the queen and immature workers. Residual sprays may cause worker ants to spread out and form secondary colonies. MAXFORCE® Ant Killer works because it is non-repellant and thus will not cause secondary colony formation.

MAXFORCE® Ant Killer Bait Stations has no insecticide odor, and it is child-resistant and easy to use. The patented bait station design allows you to inspect each bait placement and monitor the amount of ant feeding. It may be used for the control of ants wherever they are a problem (e.g., hospitals, nursing homes, day care centers, schools, residential establishments, warehousing and commercial establishments, food service, food manufacturing and food processing facilities, laboratories, computers and electronic equipment facilities, pet shops, zoos, buses, boats, aircraft, and trains.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Personal Protective Equipment (PPE)
Applicators and handlers must wear:

- Long sleeved shirt and long pants
- Shoes plus socks

Follow manufacturer's instruction for cleaning/maintaining PPE. If no such instructions for Washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

User should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Simply place each bait station indoors or outdoors immediately next to ant trails or close to areas where ants are numerous. Nests are usually located in dark, humid and warm areas close to a water and food source. For maximum effectiveness in ant control the bait station should be placed in or near wall voids, electrical outlets (if wiring permits), potted plants, waste paper baskets, garbage cans and sinks.

Bait stations can be placed in cabinets, next to food and dishes, near sensitive equipment or anywhere your ant problem occurs.

2. Indoor Use: For normal infestations, you should use 3 MAXFORCE® Ant Killer bait stations in an average size room. For heavier infestations, you will need additional bait stations in each room. If infestation persists beyond two weeks, replace all bait stations where the bait has been completely consumed and relocate bait stations that show no evidence of ant feeding.

3. Outdoor Use: Bait stations should be placed near ant activity or anywhere ants may gain access to the structure. Application sites include air conditioning units, electrical conduits, vents, pipe chases, concrete slabs, skylights on roofs; around ant mounds, garbage cans, and trees; along walls, window sills, sidewalks and driveways; on ground around structure.

4. The bait stations can be stuck to a vertical surface by peeling off the bottom label to expose adhesive.

5. Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.

6. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within one week. After placement, ant trails may be observed between the bait stations and the nests. For best results do not interfere with the ants or the stations during their use because ants must carry the bait back to destroy the queen and colony.

7. Inspect all bait stations and replace as needed for continuous control of ants.

User should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Do not remove baits from container.

STORAGE: Store in original container away from heat.

DISPOSAL: If empty: Do not reuse this container. Place in trash. If partly filled: Call your local solid waste agency or toll free number 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

GENERAL INFORMATION

MAXFORCE® ant killer bait stations contain a patented bait formulation which kills Pharaoh ants and other common household ants (see side -or- front panel for species). When properly used, MAXFORCE ant killer bait will attract foraging worker ants. The ants will feed on the bait which contains Hydramethylnon, a delayed action stomach poison. Then, the worker ants will take some of this bait back to the nest where they will pass it on to destroy the queen and the entire colony. MAXFORCE ant killer will kill both adult and larval ant forms.

MAXFORCE ant killer bait stations have no insecticide odor, are child-resistant and easy to use. The patented bait station design allows you to inspect each bait placement and monitor the amount of ant feeding. They may be used for the control of ants wherever they are a problem (e.g. hospitals, nursing homes, day care centers, schools, aircraft, residential establishments, warehousing and commercial establishments, food service, food manufacturing and food processing facilities, laboratories, computer and electronic equipment facilities, pet shops, zoos, buses, boats and trains).

Do not use residual sprays with or near the MAXFORCE bait stations, as the worker

ants must remain alive to carry the bait back to the queen and immature workers. Residual sprays may cause worker ants to spread out and form secondary colonies. MAXFORCE ant killer works because it is non-repellent and thus will not cause secondary colony formation.

- MORE APPEALING [BAIT] FLAVOR
- MORE FEEDING PER BAIT STATION
- INCREASES [ANT] FEEDING
- [MORE] APPEALING BLEND OF FOODS
- WITH [A BLEND OF MULTIPLE] FOODS ANTS PREFER
- WITH [A BLEND OF MULTIPLE] FOODS ANTS EAT
- NEW [STRONGER][BETTER] [EFFECTIVE] BAIT FLAVOR
- [KILLS] DESTROYS [THE] QUEEN AND [THE] [ENTIRE] COLONY
- EASY TO USE
- NO INSECTICIDE ODOOR, VAPOR, FUMES OR MESS
- NOTHING TO ACTIVATE
- IMPROVED FORMULA*
- VS. COMBAT ANT BAITS (For Combat subregistration only)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL PRECAUTIONS AND RESTRICTIONS

Do not remove or puncture label on bait station.

[Remove wrapper.] [Break child-resistant bait feeding stations apart from frame. [Tear along perforation lines.] For thorough ant control, use all X bait stations at the same time.] [Now the baits are ready to use.]

1. Simply place each bait station indoors or outdoors immediately [near] next to -or- near ant trails or close to areas where ants are numerous -or- where you frequently see ants. Nests are usually located in dark, humid and warm areas close to a water and food source. For maximum effectiveness in ant control the bait station should be placed in or near wall voids, electrical outlets (if wiring permits), potted plants, wastepaper baskets, garbage cans and sinks. Bait stations can be placed -or- Place bait stations in cabinets, next to dishes, near sensitive equipment or anywhere your ant problem occurs -or- anywhere ants may enter your home.
2. **INDOOR USE:** For normal infestations, you should use 3 MAXFORCE ant killer bait stations in an average size room. For heavier infestations, you will need additional bait stations in each room. If infestation persists beyond two weeks, replace all bait stations where the bait has been completely consumed and re-locate bait stations that show no evidence of ant feeding.
3. **OUTDOOR USE:** Bait stations should be placed near ant activity or anywhere ants may gain access to the structure. Application sites include air conditioning units, electrical conduits, vents, pipe chases, concrete slabs, skylights on roofs; around ant mounds, garbage cans, and trees; along walls, windowsills, sidewalks and driveways; on ground around structure.
4. The stickers provided in the box can be used to attach the bait stations to vertical surfaces if desired. -or-
4. The bait stations can be stuck on a vertical surface by peeling off the bottom label to expose adhesive.
5. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within one week. After placement, ant trails may be observed between the bait stations and the nests. For best results, do not interfere with the ants or the stations during their use because ants must carry the bait back to destroy the queen and colony.
6. Inspect all bait stations and replace as needed for continuous control of ants. -or- For continuous control of ants, replace all bait stations after 3 months of use [to keep ants from returning].
