## PROFESSIONAL INSECT CONTROL® ANT KILLER BAIT STATIONS

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

**INSPECTABLE**

DO NOT ALLOW CHILDREN OR PETS TO PLAY WITH THE BAIT STATIONS.

### CAUTION

(See [Directions and] Precautions on Side -or- Back Panel)

**ACTIVE INGREDIENT:** Hydramethylnon<sup>[†]</sup> [Tetrahydro-5,5-dimethyl-2(1H-pyrimidinone, (3-(4-(trifluoromethyl)phenyl)-1-(2-(4-(trifluoromethyl)phenyl)ethenyl)-2-propenylidene)hydrazone) ..... 1.0%

**OTHER INGREDIENTS:** ..... 99.0%

[†CAS No. 67485-29-4]

**Effective Against:**  
 Pharaoh Ants  
 Odorous House Ants  
 Black Carpenter Ants  
 Florida Carpenter Ants  
 Argentine Ants  
 Carpenter Ants  
 Red Imported Fire Ants  
 Pavement Ants  
 Crazy Ants  
 Cornfield Ants  
 Acrobat Ants  
 Thief Ants

## PROFESSIONAL INSECT CONTROL<sup>®</sup> ANT KILLER BAIT STATIONS

### FIRST AID

**IF ON SKIN:** -Take off contaminated clothing.  
-Rinse skin immediately with plenty of water for 15-20 minutes.  
-Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-334-7577 for emergency.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

#### Personal Protective Equipment (PPE)

Applicators and handlers must wear:

-Shoes plus socks

Follow manufacturer's instruction for cleaning/maintaining PPE. If no such instructions for Washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

#### User Safety Recommendations

User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

User should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Do not remove baits from container.

**STORAGE:** Store in original container away from heat.

**DISPOSAL:** If empty: Do not reuse this container. Place in trash. If partly filled: Call your local solid waste agency or toll free number 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

### GENERAL INFORMATION

MAXFORCE<sup>®</sup> Professional Insect Control Ant Killer Bait Stations contain a patented bait formulation which kills Pharaoh ants and other common household ants (see side-or-front panel for species). When properly used, MAXFORCE Professional Insect Control Ant Killer Bait Stations will attract foraging worker ants. The ants will feed on the bait which contains Hydramethylnon, a delayed action stomach poison. Then, the worker ants will take some of this bait back to the nest where they will pass it on to destroy the queen and the entire colony. MAXFORCE Professional Insect Control Ant Killer Bait Stations will kill both adult and larval ant forms.

MAXFORCE Professional Insect Control Ant Killer Bait Stations have no insecticide odor, are child-resistant and easy to use. The patented bait station design allows you to inspect each bait placement and monitor the amount of ant feeding. They may be used for the control of ants wherever they are a problem (e.g. hospitals, nursing homes, day care centers, schools, aircraft, residential establishments, warehousing and commercial establishments, food service, food manufacturing and food processing facilities, laboratories, computer and electronic equipment facilities, pet shops, zoos, buses, boats and trains).

For questions or comments about MAXFORCE, call toll free 1-800-331-8867.  
And, see the MAXFORCE website at [www.bayerprocontrol.com](http://www.bayerprocontrol.com)

Do not use residual sprays with or near the MAXFORCE Professional Insect Control Ant Killer Bait Stations, as the worker ants must remain alive to carry the bait back to the queen and immature workers. Residual sprays may cause worker ants to spread out and form secondary colonies. MAXFORCE Professional Insect Control Ant Killer Bait Stations work because it is non-repellent and thus will not cause secondary colony formation.

- MORE APPEALING (BAIT) FLAVOR
- MORE FEEDING PER BAIT STATION
- INCREASED (ANT) FEEDING
- (MORE) APPEALING BLEND OF FOODS
- WITH [A BLEND OF MULTIPLE] FOODS ANTS PREFER
- WITH [A BLEND OF MULTIPLE] FOODS ANTS EAT
- NEW (STRONGER) [BETTER] (EFFECTIVE) BAIT FLAVOR
- [KILLS] DESTROYS [THE] QUEEN AND [THE] [ENTIRE] COLONY
- EASY TO USE
- NO INSECTICIDE ODOR, VAPOR, FUMES OR MESS
- NOTHING TO ACTIVATE
- IMPROVED FORMULA\*
- VS. COMBAT ANT BAITS (For Combat subregistration only)

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### GENERAL PRECAUTIONS AND RESTRICTIONS

Do not remove or puncture label on bait station.

[Remove wrapper.] [Break child-resistant bait feeding stations apart from frame. Tear along perforation lines.] For thorough ant control, use all X bait stations at the same time. [Now the baits are ready to use.]

1. Simply place each bait station indoors or outdoors immediately [near] next to -or- near and trails or close to areas where ants are numerous -or- where you frequently see ants. Nests are usually located in dark, humid and warm areas close to a water and food source. For maximum effectiveness in ant control the bait station should be placed in or near wall voids, electrical outlets (if wiring permits), potted plants, wastepaper baskets, garbage cans and sinks. Bait stations can be placed -or- Place bait stations in cabinets, next to dishes, near sensitive equipment or anywhere your ant problem occurs -or- anywhere ants may enter your home.
2. **INDOOR USE:** For normal infestations, you should use 3 MAXFORCE ant killer bait stations in an average size room. For heavier infestations, you will need additional bait stations in each room. If infestation persists beyond two weeks, replace all bait stations where the bait has been completely consumed and re-locate bait stations that show no evidence of ant feeding.
3. **OUTDOOR USE:** Bait stations should be placed near ant activity or anywhere ants may gain access to the structure. Application sites include air conditioning units, electrical conduits, vents, pipe chases, concrete slabs, skylights on roofs; around ant mounds, garbage cans, and trees; along walls, windowsills, sidewalks and driveways; on ground around structures.
4. The elaters provided in the box can be used to attach the bait stations to vertical surfaces if desired. -or-
4. The bait stations can be stuck on a vertical surface by peeling off the bottom label to expose adhesive.
5. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within one week. After placement, ant trails may be observed between the bait stations and the nests. For best results, do not interfere with the ants or the stations during their use because ants must carry the bait back to destroy the queen and colony.
6. Inspect all bait stations and replace as needed for continuous control of ants. -or- For continuous control of ants, replace all bait stations after 3 months of use [to keep ants from returning].
