PERMANONE® READY-TO-USE INSECTICIDE

EPA REG. NO.: 432-1277

EPA EST. NO.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Permanone Ready to Use before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Permanone Ready to Use according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Permanone Ready to Use.

DIRECTIONS FOR USE

Refer to the Permanone Ready to Use product label for General Use Precautions, Mixing and Application Instructions.

For best results treat when insects are most active and weather conditions are conducive to keeping the fog close to the ground, e.g. wind speeds not greater than 10 mph.

Aerosol droplet size of an application may be determined using generally acceptable methods such as but not limited to A.I.M.S.; PC-DC-III; and Teflon®coated glass slides. When droplet sizing using either an AIMS or PC-DCIII, the machine should be adjusted to the oil setting. When using coated glass slides, an adequate volume of air should be sampled by using, for example, rotating slide impingers. Depending on the apparatus used, follow manufacturer's instructions for obtaining droplet measurements. Slides should be examined microscopically and the diameter of droplets measured in microns. Slides should be scanned until at least 200 droplets have been sized. If using Teflon coated slides a spread factor of 0.61 should be used to correct droplet diameters.

If Teflon slides are used, 84% or greater of the spray droplets shall be no more than 25 microns. No more than 3% of the spray droplets shall exceed 50 microns. The VMD shall be between 8 to 30 microns.
