Subject:

Label Amendment

EPA Reg. No. 432-1302

Tempo 20WP

Your Submission Dated 15 February, 2007

Dear Ms Brill:

The labeling referred to above submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable subject to the comments listed below. A stamped copy of the label is enclosed for your records.

- 1. Under Precautionary statements add "...and before eating, drinking, chewing gum, or using tobacco." at the end of the statement beginning with "Wash thoroughly with soap and water..."
- 2. Move the statement "Do not allow children or pets..." from the Precautionary statements to the Directions for Use section of the label.
- 3. Add "...and other aquatic organisms" to the first sentence under Environmental Hazards.
- 4. Under Directions for Use delete "Do not formulate this product into other end use products". This statement is unacceptable since it conflicts with a registrant's rights under the Formulator's Exemption (40 CFR §152.85).
- 5. Revise the statement "Including ticks that transmit Lyme disease and..." to read "Including ticks that may transmit Lyme disease and..."

6. Under Application for Wood Infesting Pests (p.10) add to the first sentence, "Such applications for termites are not a substitute for mechanical alteration soil treatment or foundation treatment. For active termite infestations get a professional inspection."

If you have any questions regarding this action, please contact Olga Odiott at 703-308-9369.

Sincerely

George T. LaRocca
Product Manager (13)

Tempo[®] 20 WP Insecticide

Bayer Environmental Science

with COMMENTS In EPA Letter Dated

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No.

For Pest Management Professionals and commercial use only.

For broad-spectrum control of crawling, flying, and wood-infesting insect pests for indoor and outdoor surfaces, as well as insect pests of trees, landscape ornamentals and residential and commercial lawns.

ACTIVE INGREDIENT:

EPA Reg. No. 432-1302

EPA Est. No.

STOP - Read the label before use. Keep out of reach of children. CAUTION

	FIRST AID
IF ON SKIN	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
IF IN EYES	 Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF SWALLOWED	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

For <u>MEDICAL</u> and <u>TRANSPORTATION</u> Emergencies <u>ONLY</u> Call 24 Hours A Day 1-800-334-7577.

For PRODUCT USE Information Call 1-800-331-2867.

Note To Physician: No specific antidote is available. Treat the patient symptomatically.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Do not get in eyes on skin, or on clothing. Avoid breathing dust or spray mist. Wash thoroughly with soap and warm water after handling. Remove contaminated clothing and wash before reuse.

Wear safety glasses, goggles, or face shield when handling the undiluted material and wear a respirator when making general surface overhead treatments indoors.

Do not allow children or pets to enter treated areas until surfaces are dry.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Remove from premises or tightly cover fish tanks and disconnect aerators when applying indoors where such containers are present. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on this label.

This pesticide is highly toxic to bees exposed to direct treatment or residues on crops or weeds. Do not apply TEMPO 20 WP Insecticide or allow it to drift onto crops or weeds on which bees are actively foraging. Additional information may be obtained by consulting your Cooperative Extension Service.

PRO FACTS					
Quick Knockdow	n & Residual Control • Non-staining				
Low Odor	No phytotoxicity on a wide range of ornamentals				
TEMPO 20 WP	Wettable powder containing 20% cyfluthrin				
CONTROLS	Indoor Pests General Household Pests Pantry and Stored Product Pests Food Processing Pests				
	Outdoor/ Perimeter Pests				
	Wood-Infesting Pests				
	Turf and Ornamental Pests				
	For list of specific insects, see directions for use.				
WHERE TO APPLY	Apply where pests have been seen or found, or can find shelter.				
	In and around buildings and structures				
	On residential, commercial and recreational areas of turf				
	On ornamentals in landscapes and interior plantscapes				
COVERAGE	Makes up to 42 gallons of finished spray solution for indoors. (420 g size)				
	Treats up to 42,000 sq ft. outdoors. (420 g size)				
MIXING INFORMATION	Mix the appropriate amount of TEMPO 20 WP with water.				
	May tank mix with other pesticides currently registered for similar uses, unless specifically prohibited.				
HOW TO APPLY	General surface spot, mist, or crack & crevice application.				
	Broadcast application to turf and foliar application to ornamentals.				
RE-APPLY	Every 7 to 10 days, if needed.				
	For turf, reapply if needed, but not more than 6 times per year.				
RE-ENTRY	Avoid contact with treated surfaces until dry.				
	People and pets may re-enter after the treated area is dry.				
QUESTIONS	For questions or comments, call toll-free 1 800 842-8020 www.nobugs.com				

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT: Read entire label and Conditions of Sale before using this product.

Do not formulate this product into other end-use products.

STRUCTURAL PESTS

FOR RESIDUAL PEST CONTROL IN AND AROUND BUILDINGS, STRUCTURES, FOOD/FEED HANDLING ESTABLISHMENTS AND MODES OF TRANSPORT

Use TEMPO 20 WP as a general surface, spot, mist, or crack and crevice treatment in and around buildings and structures. This includes schools, factories, stores, warehouses, hospitals, food processing facilities, and modes of transport. For a list of common facilities where this product may be used, see Appendix.

NDOOR PESTS				
General Household Pests		Pantry & Stored Product Pests	Food Processing Pests	
Crawling Pest		Beetles	Fruit flies	
Ants (except Pharaoh)		(exposed adults & immature stages)	Phorid flies	
Bedbugs		Cadelle	Sclarid flies	
Carpet beetles		Cigarette		
Centipedes		Confused flour	Also includes:	
Clothes moths		Dermestid	General Household Pests	
Cluster fly		Drugstore	Pantry & Stored Product Pests	
Cockroaches		Granary weevil	•	
Crickets		Hide		
Darkling beetles		Larder		
Earwigs		Leather		
Firebrats		Lesser grain borer		
Millipedes		Lesser mealworm		
Pillbugs		Merchant grain		
Silverfish		Mealworm		
Sowbugs		Red flour		
Spiders		Rice weevil	1	
Flying Pests		Sawtoothed grain		
Flies		Warehouse	1	
Gnats		<u>Moths</u>		
Hornets		Indian meal		
Midges		Mediterranean flour		
Moths				
Wasps				
Yellow jackets			1	
VHERE TO APPLY	Apply whe	ere pests have been seen or found, or can find shorevice application.	nelter. Use a general surface, spot, mis	
JSE RATE	0.1%	10 g (2 scoops) /gal water 20 g (4 scoops) /gal water gh rate for severe infestations, faster knockdown		

Always use the high rate for bees, wasps, yellow jackets and hornets.

INDOOR PESTS (conti	nued)				
HOW TO APPLY	Remove or tightly cover fish tanks and disconnect aerators during application.				
	Remove pets during application and until treated surfaces are completely dry.				
(Also see	Avoid contact with treated surfaces until dry.				
APPLICATION FOR	Wear safety glasses, goggles, or face shield and a dust/mist respirator when treating overhead areas.				
INDOOR PESTS)	General Surface Applications				
	Use a low-pressure system (do not exceed 50 psi at nozzle tip), with a fan-type nozzle to apply the dilution uniformly.				
	 In the home, all food processing surfaces and utensils should be covered or thoroughly washed following treatment. Cover exposed food or remove from area being treated. 				
	Spot, Mist, or Crack and Crevice Applications				
	Apply directly into voids, cracks and crevices using spray or foam equipment.				
	 Spray: •Use a low-pressure system (do not exceed 50 psi at nozzle tip), with a pinpoint or variable pattern nozzle or applicator equipment that delivers low volume treatments, such as the Micro- Injector® or Actisol®. 				
	 Foam: Use appropriate foam generating equipment to supply a sufficient volume of foam. Mix the dilution with manufacturer's recommended volume of foaming agent. 				
WHEN TO APPLY	When pests are seen or found				
	Re-apply every 7 to 10-days if needed.				
MIXING INFORMATION	Add product when filling spray tank with water, shake or agitate mixture.				
	Diluted spray mixture can be stored overnight. Agitate before using.				
	Can be tank mixed with other pesticides currently registered for similar uses. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.				
RESTRICTIONS	Do not treat entire area of floor or floor coverings.				
	Do not apply where electrical short circuits can occur. Use a dust or dry bait in these areas.				
	Do not apply in occupied hospital and/or nursing home rooms. Occupants may return when surfaces have dried.				
	Do not apply in occupied classrooms.				
	Do not apply to furniture or upholstery where prolonged contact by humans will occur.				
	Do not apply as a space spray.				

ADDITIONAL DIREC	TIONS FOR FOOD AND FEED HANDLING ESTABLISHMENTS					
WHERE TO APPLY	Applications may be made to both Food/Feed and non-food areas of food and feed handling establishments.					
	Food/Feed handling establishments are defined as places other than private residences in which exposed food/feed is held, processed, prepared, or served. Includes areas for:					
	receiving, storing and packing (canning, bottling, wrapping, boxing) food					
	preparing food					
	edible waste storage					
	enclosed processing systems (mills, dairies, edible oils, syrups) of food.					
	Serving areas where food is exposed and the facility is in operation are also considered food areas.					
USE RATE	Apply as a general surface spot, mist, or crack & crevice application.					
	0.05%10 g (2 scoops) /gal water 0.1% 20 g (4 scoops) /gal water					
	Use high rate for severe infestations, faster knockdown, and longer residual.					
HOW TO APPLY	General Surface Applications					
	Cover or remove all food processing and handling equipment before treatment.					
(Also see INDOOR PESTS)	After applying where food is commercially prepared or processed, wash all handling and processing equipment, benches, shelving, and other surfaces which food will contact. Rinse thoroughly with clean, fresh water.					
	Do not apply to surfaces in food-handling areas when facility is in use or when foods are exposed.					
	Do not apply directly to food.					
	Spot or Crack & Crevice Applications					
	Spot or crack and crevice application is permitted while facility is in use.					
	Cover or remove food from area being treated.					
	Do not apply directly to food or food handling surfaces.					

APPLICATION FOR INC	OOR PESTS					
GENERAL HOUSEHOLD	Use a coarse, low-pressure spray.					
PESTS Cockroaches, Crickets, Silverfish, Spiders, and others	 Treat entry points such as around water pipes, doors, windows, and eaves. Treat areas where pests normally feed or hide such as baseboards, corners, around water pipes, under refrigerators, cabinets, sinks, and stoves, being sure to spray cracks & crevices. Spot treat floor or rugs beneath furniture, in closets, and storage areas, but do not apply to entire floor area. 					
	Do not use as a "space spray".					
	IGR Note: This product can be tank mixed with an cockroach control.	n insect growth regulator (IGR) for extended				
ANTS	Apply to ant trails on walls, tile, baseboards, around pipes, under cabinets, and other places where ants are active.					
	Treat entry points such as windows and doors and	d the outdoor perimeter.				
	For best results, treat nests when possible.					
PANTRY AND STORED PRODUCT PESTS	For best results, clean area before treating. Remove and destroy infested food. Discard food accidentally contaminated with spray.					
	For cupboards, shelving, or food storage areas: Remove utensils, exposed food, shelf paper, and other items before spraying. When dried, cover shelves with clean paper before replacing items.					
COMMERCIAL STORED PRODUCT PESTS	 Commercial storage or transportation: Clean and treat warehouses, production facilities, storage areas, rail cars, truck beds, and other areas where products are stored before filling with the product. 					
PESTS IN AIRCRAFT	For use only in aircraft cargo holds					
PESTS IN LIVESTOCK	Apply as a general surface and/or a crack and crevice spray.					
HOUSING STRUCTURES	For best results, clean facilities before applying and treat outdoor perimeter areas.					
including poultry houses & pet kennels	Do not apply indoors where animals other than cattle or horses are present.					
Houses at per kenners	Do not apply to animal feedstuffs or watering equipment.					
	For best results in the high alkaline environment of broiler houses due to litter content, pre-acidify mix tank water to a pH of 5.0 or less prior to mixing with water-miscible Tempo.					
	Acidifier	Rate				
	white vinegar	½ cup per one gallon				
	citric acid	1 oz per 18 gallons				
<u></u>	sodium bisulfate (poultry water treatment; PWT)	1 oz per 32 gallons				
FLYING INSECTS	Apply to surfaces where pests collect or rest.					

		STRU	CTURAL PESTS		
OUTDOOR/PERIM	ETER PESTS			****	
Ants Bees Boxelder bugs Carpenter ants	Centipedes Cockroaches Cluster fly Crickets Elm leaf beetle	Fire ants Firebrats Fleas Flies Gnats	Ground beetles Hornets Midges Millipedes Moths	Pillbugs Scorpions Silverfish Sowbugs Spiders	Ticks Wasps Yellow jackets
WHERE TO APPLY	Apply to buil To prevent in	dings, porches, p	n seen or found, or can find patios, garages, fences and the building foundation, wa y enter or hide; also treat t	d other areas where lls, and around door	s, windows, and soffits
USE RATE	• For fire ants 0.05%10 g 0.1% 20 g	and flying pests g (2 scoops) /gal g(4 scoops) /gal w the high rate for f		ow jackets and horn	

HOW TO APPLY (Also see APPLICATIONS FOR OUTDOOR/ PERIMETER PESTS)	 Perimeter Treatment: To help prevent infestation of structures, treat area adjacent buildings in a band up to 10 feet wide. Also treat the building foundation to a height of 2 to 3 feet in areas where pests are active or can find entrance.
	Apply just enough dilution to adequately cover the area without excessive dripping or runoff. Volume can vary depending on the surface type treated. For example, mulch requires more spray than bare soil. If mulch is heavy, rake it back to expose soil before treating.
	Avoid contact with treated surfaces until dry.
WHEN TO APPLY	When pests are seen or found
	Re-apply every 7 to 10-days if needed.
MIXING INFORMATION	Add product when filling spray tank with water; shake or agitate mixture.
	Diluted spray mixture can be stored overnight. Agitate before using.
	 Can be tank mixed with other pesticides currently registered for similar uses. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.

(Scoops of TEMPO 20 WP)		Descript Consequentian			
(Gallons of finished spray) X	37.85	Percent Concentration			

APPLICATION FOR OU	TDOOR/PERIMETER PESTS
ANTS	Locate and treat ant nests, if possible. Follow trails of foraging workers, check under objects near the structure, and inspect other likely nest sites. If ants are nesting in the soil, thoroughly drench or inject the nest and surrounding soil. Treat ant trails around windows and doors, along sidewalks, or other areas where seen. Apply a perimeter treatment as described above.
BEES, WASPS, YELLOW	Use Rate: 0.1% concentration.
JACKETS, HORNETS	Make pin stream applications directly to the nests. To help avoid stings treat nests in the evening when the insects are inside the nest. For best results, check nests within one or two days to ensure complete kill. Remove and destroy treated nests to prevent emergence of newly hatched insects, secondary pest problems, and possible staining from honey. If removal is not possible, retreat nests if necessary.
BOXELDER BUGS	Apply directly to boxelder bugs that have congregated around doors and windows and similar areas where they may enter structures. Apply perimeter treatment as described above. For best results, treat infested trees early in the season. Tree spraying may require ornamental license – check with your local regulator.
CENTIPEDES, MILLIPEDES, PILLBUGS, SOWBUGS	Apply perimeter treatment to reduce the number of insects from entering the structure. Thoroughly treat mulched areas. Reduce moisture areas from around the structure.
FIRE ANTS	Use Rate: 0.1% concentration
	Thoroughly drench or inject the entire mound. When using injection treatment, you must treat the bottom of the mound. Apply dilution or foam using a downward and upward motion of the injector tool. For complete distribution, inject in several points throughout the mound.
	Treat new mounds as they appear.
	Do not use in pastures or areas of food crop production.
FLEAS & TICKS	Make a perimeter treatment, concentrating on areas where pets rest or run. For ticks, treat likely harborage areas like along paths, tall grass and other vegetation. For best results, treat the entire area where ticks could be present. Begin treating in the spring. Ticks may be re-introduced from surrounding areas by host animals. Continue treating until frost to control both larvae and adult ticks.
FLIES	Use Rate: 0.05% to 0.1%
	Apply low-volume mist or spray to outside surfaces of buildings, porches, patios, garages, fences, and other areas where flies rest.
	CLUSTER FLY: Treat in late summer or fall, just before flies begin looking for winter shelter. Spray siding, eaves, around windows and doors, window screens, and attics. To help reduce infestations, treat cracks and crevices, attics and other indoor winter hiding places.
	Note: Cluster flies may appear during winter warm spells, while snow is still on the ground.
MOSQUITOES	Spray around landscape plants, turf and ground cover, under decks, around building foundations and other places where mosquitoes may rest.
SCORPIONS	Treat around piles of firewood and other areas where scorpions may hide. When possible, remove piles of materials that can harbor the pests. Apply a perimeter treatment.

	STRUCTURAL PESTS				
WOOD-INFESTING	PESTS				
Beetles Ambrosia Deathwatch False powderpost Old house borer	Carpenter ants Carpenter bees <u>Termites</u> Subterranean Formosan Drywood				
Powderpost					
WHERE TO APPLY	Apply where pests have been seen or found, or can find shelter.				
USE RATE	0.1% 20 g (4 scoops) / gal water				
HOW TO APPLY	Apply spray or foam as described in application section.				
(Also see Application section)	Avoid contact with treated surfaces until dry.				
WHEN TO APPLY	When pests are seen or found				
	Re-apply every 7 to 10-days if needed.				
MIXING INFORMATIO	Add product when filling spray tank with water; shake or agitate mixture.				
	Diluted spray mixture can be stored overnight. Agitate before using.				
	Can be tank mixed with other pesticides currently registered for similar uses. To be sure of physic compatibility, first prepare a sample in a small jar using the proper proportions of water and product Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.				
	Foam applications: Mix End-use dilution with manufacturer's recommended volume of foaming age for 0.05 to 0.1% concentration.	ent			

CARPENTER ANTS	In houses and other structures: Apply around doors and windows and other places where carpenter ants may enter. Spray or foam into cracks & crevices, or spray, mist or foam through small drilled holes into voids where ants or nests are present. Use enough spray or foam to cover the area. Do not exceed 1	
	gallon of dilution per 1000 square feet.	
	Inside trees, utility poles, fencing and decking materials and similar structural members: Drill to find the interior infested cavity and inject dilution or foam using an appropriate treatment tool with a splashback guard.	
	Tunneling in soil: Apply as a soil drench or inject the dilution or foam in the soil at intervals of 8 to 12 inches. Use 1 gallon of dilution per 8 square feet. Establish a uniform vertical barrier at the edge of walls driveways or other hard surfaces where ants are tunneling beneath the surfaces.	
	Protecting firewood from carpenter ants: Treat soil beneath firewood before stacking at 1 gallon of dilution per 8 square feet.	
	Do not treat firewood with this product.	
CARPENTER BEES	In structures: Spray or foam directly into gallery entrance holes. Leave entrance open for 24 hours to be sure that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.	
WOOD-INFESTING	On surfaces in homes, apartments, and other structures	
BEETLES	For small areas, brush or spray evenly on wood surfaces.	
	For large or overhead areas, thoroughly cover wood surfaces with a coarse spray.	
	Protect surfaces below the treated area from accidental dripping by covering with disposable plastic sheeting or other material that can be thrown away after treatment.	
	In localized areas: Apply dilution or foam to voids and galleries in damaged wood, in spaces between wooden structural members, and between the sill plate and foundation. Apply to inaccessible areas by drilling, and then injecting, spraying, or misting the dilution or foam into the damaged wood or wall voids.	

APPLICATION FOR WOOD-INFESTING PESTS (continued)		
DRYWOOD AND ABOVE-GROUND SUBTERRANEAN TERMITES	This type of application is intended to be a supplemental treatment for control of drywood and above- ground subterranean termites and other wood-infesting insects.	
	In localized areas: Apply dilution or foam to voids and galleries in damaged wood, to spaces between wooden structural members, and between the sill plate and foundation. Apply to inaccessible areas by drilling, and then injecting, spraying, or misting the dilution or foam into damaged wood or wall voids.	
	Swarming or reproductive stages: Apply dilution to the swarm or area on which the termites collect. Make applications to attics, crawl spaces, unfinished basements or man-made voids with a coarse fan spray to control exposed reproductive forms of termites.	
	Above-ground termites inside trees, utility poles, fencing and decking materials and similar structural members: Drill to find the infested cavity and inject dilution or foam using an appropriate tool with a splashback guard.	
	Termite carton nests: Inject dilution or foam into building voids or tree cavities using a pointed injection tool. Several injection points to varying depths may be needed. For best results, remove carton nest material when possible.	
	Protecting firewood from termites: Treat soil beneath firewood before to stacking at 1 gallon of dilution per 8 square feet.	
	Do not treat firewood with this product.	

	· 	TURF PESTS	
TEMPO 20 WP controls des	signated pests on landscape an	d recreational turf.	
TURF PESTS		USE RATE	
Ants Armyworms Crickets Cutworms Earwigs	Grasshoppers Japanese beetles (adult) Sod webworms Ticks (including deer ticks)	5 to 10 grams (1 to 2 scoops) per 1000 sq ft or 7.7 to 15.4 oz per acre Use high rate for severe infestations, faster knockdown, and longer residual.	
Black turfgrass ataenius (adults) Bluegrass billbug (adult) Chinch bugs Chiggers Fire ants (aids in control)	Fleas Hyperodes weevil (adult) Mole crickets Scorpions	10 grams (2 scoops) per 1000 sq ft or 15.4 oz per acre	
WHERE TO APPLY	For use on landscape and recreational turfgrass. Not for use on turf grown for research, commercial seed production, sale, or other commercial use. Not for use on golf course turf. Apply where pests have been seen or found, or can find shelter. Permitted areas include but are not limited to: home lawns, business complexes, apartment buildings, airports, cemeteries, parks, playgrounds, recreational fields, institutional grounds, athletic fields, and other landscape turf grass.		
HOW TO APPLY (Also see APPLICATION FOR TURF PESTS)	Use an accurately calibrated sprayer. Apply uniformly using spray nozzles with a coarse droplet size such as flood jet nozzles. Keep children and pets off treated areas until lawn has dried.		
WHEN TO APPLY	Apply when pests first appear. Reapply as needed based on pest reinfestation. Do not treat more than 6 times per year. Consult your state Cooperative Extension Office for the specific timing in your area.		
MIXING INFORMATION	 Add product when filling spray tank with water; shake or agitate mixture. Diluted spray mixture can be stored overnight. Agitate before using. Can be tank mixed with other pesticides currently registered for similar uses. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates. COMPATABILITY: Compatible with commonly used fungicides, miticides, liquid fertilizers and other insecticides. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. 		

RESTRICTIONS	$\overline{\cdot}$	Do not apply this product by aerial application or by any type of chemigation system.
	١.	Do not apply when the average wind speed is greater than 15 mph.
	۱.	Do not allow drift onto ponds, streams, or lakes.
	•	Do not apply when turf grass areas are water logged or the soil is saturated with water (i.e., will not accept irrigation).

APPLICATION FOR TURF PESTS		
ARMYWORMS, CUTWORMS, SOD WEBWORMS	Do not water or mow for at least 24 hours following application.	
BILLBUGS	Apply when adults first appear in the spring. In temperate climates, this application will also control overwintering chinch bugs.	
CHINCH BUGS	For best results, water the turf immediately after application to aid in the penetration of the active ingredient into the thatch layer where chinch bugs dwell.	
For best results, treat the entire area where ticks could be present. Begin treating in the sp be re-introduced from surrounding areas by host animals. Continue treating until frost to continue trea

USE RATE	 55 to 190 grams TEMPO 20 WP per 100 gallons of water Use high rate for severe infestations, faster knockdown, and longer residual. 				
		ate for control of emeral			

ORNAMENTAL PESTS	(continued)	
HOW TO APPLY (Also see APPLICATION	Apply as a dilute spray just to the point of run-off but do not allow excess run-off. For hard-to-wet foliage such as holly, pine, or ivy, adding a spreader-sticker may enhance knockdown and residual activity. For best results, spray thoroughly for good coverage including the underside of leaves for pests that feed or rest there.	
FOR ORNAMENTAL PESTS)	Spray plants in bloom at times when pollinating insects are not present, such as early morning or late evening.	
	Remove any animal feeding dishes prior to treatment.	
	Avoid contact with treated surfaces until dry.	
WHEN TO APPLY	Apply when pests first appear. Reapply as needed based on pest infestation.	
	Consult your state Cooperative Extension Office for the specific timing in your area.	
MIXING INFORMATION	Add product when filling spray tank with water; shake or agitate mixture.	
	Diluted spray mixture can be stored overnight. Agitate before using.	
	Can be tank mixed with other pesticides currently registered for similar uses. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.	
	COMPATABILITY: Compatible with commonly used fungicides, miticides, liquid fertilizers and other insecticides. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products.	
RESTRICTIONS	Do not apply to any food crop.	
	Do not allow drift onto ponds streams or lakes.	

APPLICATION FOR O	RNAMENTAL PESTS		
ANTS, CRICKETS, SPIDERS, MIDGES, WASPS AND FLIES	Apply as a general spray, concentrating on damp areas beneath shrubbery, around foundations and in areas of tall grass or weeds in ornamental areas and areas adjacent to buildings.		
BAGWORMS	Spray when bagworms first begin to hatch. If possible, apply directly to the larvae. Young larvae are easier to control.		
BLACK VINE WEEVIL (adult)	Use rate: 75 to 190 grams per 100 gallons of water. Apply as needed when adults and damage are first noticed in spring and at 3 to 4 week intervals while weevils and notching are observed. Addition of a spreader/sticker at recommended rates may enhance control of insects on certain species of ornamentals having difficult to wet foliage.		
COCKROACHES	Spray hiding or resting places such as under shrubbery, in ground covers and mulching materials, in hollow trees, etc.		
SCALE (CRAWLERS)	Spray thoroughly, including foliage, trunk, limbs, and twigs.		

STORAGE AND DISF	POSAL	
Do not contaminate water, food, or feed by storage or disposal.		
Storage:	 Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed. Protect from freezing. Store in original containers and out of the reach of children, preferably in a locked storage area. Handle and open container in a manner as to prevent spillage. 	
Pesticide Disposal:	 Pesticide wastes are hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. 	
Container Disposal:	 Do not use container in connection with food, feed, or drinking water. Completely empty container into application equipment. Triple rinse, or equivalent. Dispose of container by offering for recycling or reconditioning. Or puncture and dispose of container in a sanitary landfill, or by incineration, or, if allowed by state and local authorities by burning. If burned, stay out of smoke. 	
Spills:	If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. • Do not walk through spilled material. • Dispose of as directed for pesticides above. • Keep unauthorized people away. • You may contact the Bayer Emergency Response Team for decontamination procedures or any other assistance at 800-414-0244 or contact Chemtrec at 800-424-9300.
