WASHINGTON, D.C. 20460

OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

FEB 21 2009

Mr. Richard M. Gorrel
Bayer Environmental Science
2 T. W. Alexander Drive,
Research Triangle, NC 27709

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4

Dear Registrant:

The Agency is in receipt of your Application(s) for Pesticide Notification under
~~Pesticide Registration Notice (PRN) 2007-4 dated January 30, 2009 for:~~

EPA Registration 432-1476 Tiberon 2.8% SC (Plant Growth Regulator)

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Banza Djapao of my staff at 703-305-7269.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

RE: Tiberon 2.8% SC plant growth regulator (EPA Reg. No. 432-1476):
Notification to Add the Revised Storage Disposal Statement

Dear Ms. Arrington:

Bayer Environmental Science (BES) is submitting Tiberon 2.8% SC revised label to add the EPA mandated storage disposal statement. The changes are the same as the EPA example and therefore the label is being submitted by notification.

FIRST AID

IF IN EYES:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
IF SWALLOWED:	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.

PRECAUTIONARY STATEMENTS

WARNING

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Harmful if swallowed. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear protective eyewear, long-sleeved shirt, long pants, shoes plus socks, and chemical resistant gloves made of a waterproof material.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product concentrate. Do not reuse them.

Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users must wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Users must remove clothing immediately if pesticide gets inside. Then wash body thoroughly and change into clean clothing. The contaminated clothing must be washed before reuse.

Users must remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing. Wash the outside of gloves before removing.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations. Read entire label before using this product.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE

Store in original container and keep tightly closed. Store in a cool dry place.

PESTICIDE DISPOSAL

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL

Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by incineration or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses; and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry-interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls; chemical-resistant gloves made of a waterproof material; shoes plus socks; protective eyewear.

GENERAL PRECAUTIONS AND RESTRICTIONS

For local recommendations on rates, spray volumes (gallons of water per acre), and spray equipment under varying temperature and rainfall conditions consult Bayer Environmental Science Representative for his experience with this product in your area.

Use Directions for Tiberon Plant Growth Regulator

General Information

Tiberon is a plant growth regulator that inhibits auxin activity, particularly in meristematic plant tissue. As a result, apical dominance is suppressed. This effect has resulted in increased branching of trees without the need to prune the central leader. Increased branching in shrubs and cut-flowers can also be achieved. Plants treated with Tiberon are often more compact than untreated plants.

Branching is typically induced near actively growing terminals. In some plants, such as California pepper tree and Chinese flame tree (*Koelreuteria bipinnata*), buds also break in blank wood below the terminal shoot apex. Effects on auxin activity are temporary, usually about 3 weeks. Additional treatments may be made to continue the effect. Treatment intervals for each specific use need to be evaluated on a case-by-case basis.

This product may replace the need to prune off the terminal growth to induce branching or can be used in conjunction with pruning or pinching.

Prior to the production-scale use of this product small-scale on-site testing should be implemented for the specific site and variety to determine appropriate rate to provide desirable performance. Tiberon may be used in a program approach with other plant growth regulators, but it is recommended that all uses in a program with other plant growth regulators be evaluated on a case-by-case basis.

Application

Tiberon is applied as a broadcast spray. Spray foliage to drip. Entire plants or specific plant parts may be treated. Use of a non ionic adjuvant may promote increased activity. Plants must be vigorously growing to achieve the branching response. This product is acidic. Application of Tiberon on leaves treated with copper can result in leaf burn.

Tiberon can be used in nursery sites on any non-bearing plant. However, testing on a small scale should be conducted on-site to determine performance and impact on plant quality prior to use on a large scale. Consider testing various rates, timing, and one vs. two applications for optimal response at each location. Results may vary from year to year.

Use on Ornamentals and Cut Flowers

The following are general guidelines. Plants must be in an active and vigorous growing condition at the time of application and for several weeks following the application. Any ornamental plant that has shown a desirable response to Tiberon may be considered as a candidate for application of this product. Consult the rate chart below for the correct amount of Tiberon per gallon or liter of water.

Most woody ornamentals respond well to 1 to 2 applications of 50 to 200 ppm. Typically one application of 100 ppm is adequate. Many herbaceous ornamentals respond to applications between 5 and 20 ppm.

For Lilacs use 1-3 applications of 100-200 ppm one month apart to achieve the desired amount of branching.

Use 50 to 75 ppm rate range for Goldenrod (*Solidago*).

Some species respond to 5 to 20 ppm, including Bradford pears, and Myrtle (*Myrtus cummunis*).

Ornamentals that have shown a favorable response (increased branching) to Tiberon:

Common Name	Scientific Name
Abelia	<i>Abelia gaucherie</i>
Anise	<i>Illicium parviflorum</i>
Arizona redwood	<i>Vuaquelinia californica</i>
Azalea	<i>Rhododendron sp</i>
Barberry	<i>Berberis thunbergii</i>
Birch	<i>Betula spp</i>
Blueberry (non bearing ornamental)	<i>Vaccinium spp</i>
Bottle brush	<i>Callistemon lanceolatus</i>
California pepper tree	<i>Schinus molle</i>
Camellia	<i>Camellia spp</i>
Carissa	<i>Carrisa macrocarpa tuttlei</i>
Cherry	<i>Prunus spp</i>
Chinese flame tree	<i>Koelreuteria bipinnata</i>
Convolvulus	<i>Convolvulus spp</i>
Coneflower, Eastern purple	<i>Coneflower, Eastern purple</i>
Coreopsis	<i>Coreopsis rosea</i>
Crabapple	<i>Malus spp</i>
Crape myrtle	<i>Lagerstroemia sp</i>
Croton	<i>Codiaeum spp</i>
Eastern redbud	<i>Cercis canadensis</i>
Euonymus	<i>Euonymus alata</i>
Ficus	<i>Ficus nitida</i>
Flowering quince	<i>Chaenomeles spp</i>
Gardenia	<i>Gardenia jasminoides 'veitchii'</i>
Common hawthorn	<i>Crataegus spp</i>
Hibiscus (tropical)	<i>Hibiscus spp</i>
Honey locust	<i>Glidetsia triacanthos</i>
Hydrangea	<i>Hydrangea spp</i>
Indian hawthorn	<i>Raphiolepis indica</i>
Holly/hinkberry	<i>Ilex glabra</i>

Common Name	Scientific Name
Holly	<i>Ilex crenata</i> 'Sky Pencil'
Holly/Burford	<i>Ilex cornuta</i> 'Burfordii'
Japanese ternstroemia	<i>Ternstroemia gymnanthera</i>
Little-leaf linden	<i>Tilia cordata</i>
Loquat	<i>Eriobotrya japonica</i>
Myrtle	<i>Myrtus</i> spp
Oak	<i>Quercus</i> spp
Oleander	<i>Nerium oleander</i>
Phlox	<i>Phlox paniculata</i>
Physocarpa	<i>Asclepias physocarpa</i>
Privet	<i>Ligustrum</i> spp
Purple coneflower	<i>Echinacea purpurea</i>
Rose	<i>Rosa</i> spp
Spirea	<i>Spirea</i> spp
Tree lilac	<i>Syringa reticulata</i>
Viburnum	<i>Viburnum tinus</i>
Xylosma	<i>Xylosma senticosum</i>

Ornamentals that have not shown a favorable response to Tiberon:

Common Name	Scientific Name
Acacia	<i>Acacia redolens</i>
Acacia	<i>Acacia</i> spp
Blue Girl holly	<i>Ilex</i> spp
Boronia	<i>Boronia</i> spp
Butterfly bush	<i>Buddleia</i> spp
Cape honeysuckle	<i>Tecomaria capensis</i>
Cistus	<i>Cistus corbariensis</i>
Common buckthorn	<i>Rhamnus</i> spp
Desert pine	<i>Pinus eldarica</i>
Dieffenbachia/dumb cane	<i>Dieffenbachia seguine</i>
Dwarf schefflera	<i>Schefflera aboricola</i>
Heller Japanese holly	<i>Ilex crenata</i> 'Helleri'
Hosta	<i>Hosta</i> spp
Hydrangea	<i>Hydrangea macrophylla</i> 'Geoffrey Chadbundt'
Impatiens	<i>Impatiens capensis</i>
Jacaranda	<i>Jacaranda acutifolia</i>
Japanese pieris	<i>Pieris japonica</i> 'Cavatine'
Juniper	<i>Juniperus horizontalis</i> 'Blue Rug'
Maple	<i>Acer</i> spp
Mock orange	<i>Pittosporum tobira</i>
Nandina/Heavenly bamboo	<i>Nandina domestica</i>
Olive	<i>Olea europea</i>
Photinia	<i>Photinia</i> spp
Rhododendron	<i>Rhododendron</i> 'Golden Touch'
Schefflera	<i>Schefflera</i> spp
Star jasmine/confederate jasmine	<i>Trachelospermum jasminoides</i>
Strawberry tree	<i>Arbutus unedo</i>
Rosemary	<i>Rosemarinus officinalis</i>
Russian sage	<i>Perovskia atriplicifolia</i>
Variegated privet	<i>Ligustrum sinensis</i> 'variegata'
Viburnum	<i>Viburnum nudum</i>
Winter daphne	<i>Daphne odora</i>
Wisteria	<i>Wisteria</i> spp

Use on fruit trees (non-food only)

Sweet cherry and Apple varieties: 1 to 2 applications of 50 to 100 ppm. Typically one application at 100 ppm provides acceptable branching. If using a two-spray regime, consider making the second application about 1 week later. Some reduction in growth of the central leader may be observed with two applications.

Pear and Plum varieties: 1 application of 5 to 20 ppm. Typically 10 to 20 ppm provides acceptable branching.

Treatments to nectarine have not been effective.

Application timing for fruit trees (non-food only)

The following information is for initial guidelines for application timing. It is important to have a vigorously growing plant at the time of application and for several weeks following application to obtain satisfactory branching and good development of new branches.

Induced branching of cherries tends to occur 4 to 8 inches above the height of the terminal shoot apex at the time of application. Induced branching in apples occurs about 1 to 4 inches below the height of the terminal shoot apex at the time of application.

Tiberon Rate Chart				
Cyclanilide	Amount Tiberon per volume of water			
ppm final concentration	ounces per gallon water	ounces per 100 gallons water	mL per liter water	mL per 100 liter water
1	0.0045	0.45	0.035	3.5
5	0.0220	2.20	0.180	18
10	0.0450	4.50	0.350	35
20	0.0900	9.00	0.700	70
50	0.2200	22.00	1.800	180
100	0.4500	45.00	3.500	350
200	0.9000	90.00	7.000	700
500	2.2400	224.00	18.000	1800
1000	4.5000	450.00	35.000	3500

Do not tank mix Tiberon SC with pesticides or liquid fertilizers containing micronutrients.

Use Restrictions

- Do not apply more than 0.34 pound active ingredient per acre per crop per year
- Do not apply more than 3 applications per crop per year

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.
