JUN 27 2011

Subject: Supplemental Label: For additional directions for use on turf
Product Name: Specticle 20 WSP Herbicide
EPA Reg. No. : 432-1499
Application Dated: June 10, 2011

Dear Mr. Gorrell:

The supplemental labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable.

At your next label printing, or within eighteen (18) months of the date of this letter, whichever comes first, you must incorporate this supplemental labeling into the main product labeling. A stamped copy of your label is enclosed for your records.

If you have any questions concerning this decision, please contact Beth Benbow at (703) 347-8072 or benbow.bethany@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Kable Bo Davis".

Specticle 20 WSP Herbicide

EPA Reg. No. 432-1499

For Use on Turf

Expires: June 23, 2014

Supplemental Label

SPECTICLE 20 WSP HERBICIDE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label and the product package label before using this product. This Supplemental Label must be in possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product label for Specticle 20 WSP Herbicide.

DIRECTIONS FOR USE OF SPECTICLE 20WSP ON TURF

USE PRECAUTIONS FOR SPECTICLE 20WSP ON TURF

- Do not apply to golf course tees or collars.
- Do not verticut within 1 month prior to or after an application of Specticle 20WSP.
- Do not apply to newly seeded turf. Established turf is defined as turf 1 year after seeding.
- Do not apply to turf that is showing signs of stress including winterkill, spring dead spot, transitioning ryegrass. Additional stress factors include, but are not limited to, bermudagrass spring root decline, soil compaction, diseases (both foliar and root), nematodes, salt accumulation, shade, foot or equipment traffic, and drought. Use of Specticle 20WSP may increase severity of symptoms on these turf conditions.
- Do not use on the following cultivars of Seashore Paspalum (*Paspalum vaginatum*): Seaspray, Salam, Sea Isle 2000, SeaDwarf, Aloha, SeaGreen, SeaWay, Adalayd/Excalibre, Neptune, and any other cultivar not listed on the label.

Activated charcoal has been shown to deactivate Specticle 20WSP if applied within several days of application. Application of charcoal within 2 weeks after an application of Specticle 20WSP will not reverse symptoms immediately, but it will aid in turf recovery over time. If it should be necessary to re-sod areas treated with Specticle 20WSP, apply activated charcoal to bareground prior to laying the sod. Follow directions for the amount of charcoal to apply on the activated charcoal label.

This supplemental label expires on June 23, 2014 and must not be used or distributed after this date.

ACCEPTED

JUN 27 2011

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 432-1499
