OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

Ms Geraldine Meunier
Bayer Environmental Science
2 T. W. Alexander Drive,
Research Triangle, NC 27709

MAR 10 2014

Subject: Notification for Label Change per PRN 98-10: Add marketing claims –Pictures to be used on commercial label
Submission date: 1/31/2014
Product Name: Chipco 26019 T Fungicide
EPA Reg. No. 432-1505
Decision Number 487854

Dear Registrant:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated 1/31/2014 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have questions concerning this letter, please call Banza Djapao at 703-305-7269 or via email at djapao.banza@epa.gov, or you may call me at 703-305-5410.

Sincerely,

A handwritten signature in black ink, appearing to read "Hope Johnson".

Hope Johnson
Product Manager 21
Fungicide Branch
Registration Division (7504P)

GROUP 2 11 FUNGICIDE

CHIPCO® 26019T Fungicide

[ABN: INTERFACE® FUNGICIDE; INTERFACE Stressgard]

- Editorial Note – Marketing claim positioned here

A Fungicide for the enhancement of greener and more dense turfgrass and for the protection against winter stress and for the prevention and control of certain diseases of turfgrass.

Editorial Note – [Bracketed text] is optional

ACTIVE INGREDIENT:

Iprodione: 3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide)..... **23.10%***
 Trifloxystrobin (CAS No. 141517-21-7)..... **1.44%***

OTHER INGREDIENTS: **75.46%**

TOTAL: **100.00%**

*Equivalent to 2.14 pounds Iprodione and 0.13 pounds Trifloxystrobin per gallon.

EPA Reg. No. 432-1505

EPA Est. No. 264-MO-02

KEEP OUT OF REACH OF CHILDREN

CAUTION

For MEDICAL and TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577

For PRODUCT USE Information Call 1-800-331-2867

FIRST AID

If in eyes:	<ul style="list-style-type: none"> • Hold eyes open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. • Call a poison control center or doctor for treatment advice.
If swallowed:	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to by a poison control center or doctor. • Do not give anything to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency for additional information call toll free 1-800-334-7577.	
Note to Physician: If ingested, induce emesis or lavage stomach. Treat symptomatically.	

NOTIFICATION

MAR 10 2014

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes moderate eye irritation. Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

PERSONAL PROTECTIVE EQUIPMENT

Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber ≥ 14 mils, nitrile rubber ≥ 14 mils, and neoprene rubber ≥ 14 mils. If you want more options, follow the instructions for category C on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators and other handlers must wear:

Long-sleeved shirt and long pants,

Chemical-resistant shoes plus socks,

and chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile or neoprene gloves.

In addition, mixers and loaders must wear a chemical-resistant apron. See engineering controls for additional requirements.

For high-pressure hand wand and backpack sprayer application, mixers, loaders and applicators must wear:

Double-layer clothes,

Chemical-resistant gloves,

Socks plus chemical resistant shoes, and

Dust/mist respirator

For other handling activities and in case of a spill or other emergency exposure, handlers must wear:

Coveralls over long-sleeved shirt and long pants,

Chemical-resistant gloves,

Chemical-resistant footwear, and

Chemical-resistant apron when cleaning equipment.

Follow manufacturer's instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing or other materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

ENGINEERING CONTROLS

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations	
Users should:	<ul style="list-style-type: none"> Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

PRODUCT INFORMATION

In order to assure maximum crop tolerance and disease control, follow directions on this label and all the precautions and limitations of the package label.

PRODUCT USE RESTRICTIONS

Use of this product at residential sites is prohibited.

Except for use on golf courses, if applying this product adjacent to a water body such as a lake, reservoir, river, permanent stream, marsh or natural pond, estuary, or commercial fish pond, there must be at least a 25-foot vegetative buffer strip between the water body and the point of application.

For golf courses only, do not apply to turf cut higher than 1 inch on golf holes where water bodies are present.

Do not apply this product when the wind direction is toward aquatic areas.

Do not apply by aerial application.

Do not apply by chemigation.

APPLICATION INFORMATION

Applications using sufficient water volume to provide thorough and uniform coverage generally provide the most effective disease control. Do not make applications when conditions favor drift beyond the target application area. Avoid spraying when windy, high temperature, drought, low relative humidity, or temperature inversion conditions exist.

SPRAY MIXING AND COMPATIBILITY

In general, begin with clean spray equipment and add one-half of the required amount of water to the spray or mixing tank and start agitation. Add the required quantity of fungicide and the tank-mix partner if applicable to the water and complete filling with water to the required total volume. Follow the recommendations of your State Cooperative Extension Service for tank-mixing with other products. In general, follow the order beginning first with water soluble packaging (wait for it to completely dissolve), wettable powders and water-dispersible granular products, liquid flowables and suspension concentrates and emulsifiable concentrates last. Maintain agitation throughout spraying. Do not allow spray mixture to remain in the tank overnight, or for long periods during the day without agitation.

The crop safety of all potential tank-mixes with Chipco® 26019T Fungicide including additives and other pesticides has not been tested on all crops. Follow more restrictive labeling of any tank mix partner. Do not tank mix with any product which contains a prohibition on tank mixing. Before applying any tank-mixture not specifically identified on this label, confirm safety to the target crop. Chipco 26019T Fungicide is compatible with most commonly used fungicide, herbicide, insecticide, and foliar nutrient products. However, the physical compatibility of Chipco 26019T Fungicide with all potential tank-mix partners has not been fully investigated. If tank mixing with other pesticides is desirable, conduct a jar test with the volumes and rates typically used in agricultural application. Using a small container of water, add the proportionate amounts of the products: wettable powders and water-dispersible granular products first, then liquid flowables and emulsifiable concentrates last. After thoroughly mixing, let stand for at least 15 minutes. Look for signs of separation, globules, sludge, flakes, or other precipitates. Physical compatibility is indicated if the combination remains mixed or can be remixed readily.

RESISTANCE MANAGEMENT

The active ingredients in Chipco 26019T Fungicide belong to the dicarboxamides (Group 2) and the QoI inhibitor class of strobilurins (Group 11). To maintain long term effectiveness of this fungicide follow the specific resistance management guidance listed on the label to delay the development of fungicide resistance.

- 1. Start spray programs early:** Spray programs that begin before pathogens attack will help keep fungal populations low and reduce chances of resistance. Consult your local extension specialist, certified advisor and/or manufacturer representative for recommendations on when to begin spray programs.
- 2. Alternate products:** Use spray programs that include alternation of products from different fungicide groups. Group numbers are listed in a box at the top right of product labels.

3. Use at least the minimum labeled rate and do not overstretch spray intervals: Use of rates below the minimum labeled rate will shorten the useful life of fungicides. Also, stretching application intervals too long may leave turfgrasses unprotected, further allowing opportunity for resistance development.

4. IPM: Integrate applications of fungicides into an overall disease and pest management program. Follow cultural practices known to reduce disease development. Consult your local extension specialist, certified advisor and/or manufacturer representative for additional IPM strategies established for your area. This product may be used in Agricultural Extension advisory (disease forecasting or risk assessment) programs, which recommend application timing based on environmental factors favorable for disease development.

TURF SPECIFIC USE DIRECTIONS

PLANT HEALTH

Chipco 26019T Fungicide used at the prescribed labeled rates protects the turf against winter stress resulting in faster spring green up. When applied during the spring, summer, or fall, Chipco 26019T Fungicide may result in healthier, denser, and greener turf and alleviates summer stress.

Chipco 26019T Fungicide is a foliar applied fungicide, specified for turfgrass disease control on golf courses, sod farms, and institutional areas where fine turf is grown. When used in conjunction with good turf management practices, Chipco 26019T Fungicide is effective in controlling the following diseases:

Spring, Summer And Fall Diseases: Dollar Spot, Brown Patch, Large Patch, Fusarium Blight and Necrotic Ring Spot*, Leaf Spot and Melting Out, Microdochium Patch, Pink Patch, Rapid Blight, Corticum Red Thread, Curvularia Blight, Anthracnose (suppression) and Rust.

Winter Diseases: Gray Snow Mold

Apply the specified rates as indicated in the table in 0.5 to 10 gallons of water per 1,000 sq ft. Do not drench. Do not allow the spray mixture to stand for longer than 12 hours as some breakdown of the product may occur. Maintain agitation during spray operations. Apply with a properly calibrated sprayer.

*Not registered for use in California to control this disease.

10/13

Do not mow or irrigate treated areas until the foliage is completely dry, usually a 24-hour waiting period following treatment is preferred.

Do not graze animals on treated turf. Do not feed clippings from treated turf to livestock or poultry.

*Not registered for use in California to control this disease.

TANK MIXTURES

ADDITIONAL DISEASE CONTROL

If turf is threatened by additional diseases, Chipco 26019T Fungicide is compatible with most commonly used fungicides such as ProStar®, and Chipco Triton® FLO. If a tank mixture is used, follow label directions for the use of that product. When tank-mixing with other products, it is the responsibility of the end-user/applicator to insure that the tank-mix partner is registered in the state where the application is being made.

Do not exceed a total of 30 fl oz Chipco 26019T Fungicide per 1,000 sq ft per year with a maximum of 6 applications.

Do not exceed the maximum labeled rate for any tank mix partner.

Summer Stress Complex/Summer Decline: For management of Summer Stress Complex/Summer Decline, apply Chipco® Signature™ Fungicide at 4 to 8 oz of product per 1,000 sq ft with Chipco 26019T Fungicide at 3 to 7 fl oz of product per 1,000 sq ft.

Pythium Blight: Pythium blight will be controlled by the tank mixing of CHIPCO® Signature™ Fungicide or ALIETTE® WDG brand Fungicide or Banol Fungicide with Chipco 26019T Fungicide. If a tank mixture is used, follow label directions for the use of that product and apply at the rate labeled for control of the target disease organism.

Gray Snow Mold: Tank-mix Interface with a labeled rate of fungicide for the preventive control of Gray Snow Mold such as Chipco Triton® FLO (0.75-0.85 fl oz/1000 sq ft).

Application must be made in autumn before snow cover occurs. Apply with sufficient water to obtain adequate coverage (1 to 5 gallons of spray solution per 1,000 sq ft). Use the higher rate if the turf remains frozen prior to snow cover. For optimal control, reapply this treatment if a winter thaw and loss of snow cover occurs.

Not all products are registered in all states; please verify state registration of ProStar®, Chipco Triton® FLO, Chipco® Signature™ Fungicide, ALIETTE® WDG brand Fungicide, and Banol Fungicide in your state before selling, distributing, or using.
