**DIRECTIONS FOR USE
 GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ALGAEICIDE CONCENTRATE is a non-chlorine algicide for use in swimming pools. For use in pools, the following directions should be followed. Growth of algae is inhibited and algae are killed by ALGAEICIDE CONCENTRATE.

For pools having just visible algae, add 1 fluid ounce of ALGAEICIDE CONCENTRATE to the pool water and remove settled algae debris.

For treatment of a heavily algae-infested pool, add 4 fluid ounces of ALGAEICIDE CONCENTRATE to the pool water.

To maintain pool water free of algae, add 1 fluid ounce to 4 fluid ounces of ALGAEICIDE CONCENTRATE to the pool water. Pool water should be made every 7 to 10 days.

ALGAEICIDE CONCENTRATE is a non-chlorine algicide. It is commonly used to treat pools and effective at both low and high pH. ALGAEICIDE CONCENTRATE can be used for pools containing chlorine and may reduce the amount of those chemicals normally added. However, do not mix ALGAEICIDE CONCENTRATE with other non-chlorine liquid chlorine products.
