BRAND

ROTENONE GARDEN DUST

ACTIVE INGREDIENTS:

Rotenone 1.00%

Other Cube Resins 2.00%

INERT INGREDIENTS 97.00%

100.00%

DIRECTIONS

As a dust, sift from the shaker top carton, or better still, apply with a mechanical duster or dust gun. Dust plant thoroughly, covering both upper and lower sides of foliage, repeating application as needed.

As a spray, stir 4-6 tablespoons into a paste with a little water, then add water to make 1 gallon of spray. The mixture should be agitated occasionally to maintain an effective suspension. Spray plants thoroughly, and repeat application as necessary.

Inasmuch as this product is used under conditions beyond our control, neither the maker or the seller assumes any responsibility for any deleterious effects resulting from its use.
