DIRECTIONS FOR GRAIN SURFACE SPRAY

For aiding in the control of ANGOUMOIS GRAIN MOTH, INDIAN MEAL MOTH and certain other insects infesting the SURFACE of stored grain. Application may be made with a trombone or compressed air sprayer, or with a power sprayer. Apply at the rate of 2 quarts per 500 square feet of grain surface.

Corn in storage may be sprayed with "Sure Death Brand" Grain Surface Spray in June, and again in August, thus aiding in the control of surface insects infesting corn.

Do not inhale spray mist or vapor.
harmful if swallowed.
Do not store or use near heat or open flame.

This product is toxic to fish. Keep out of any body of water. Apply this product only as specified on this label. Rinse equipment and containers and dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed by punching holes in them and burying with wastes, or by burning. (Keep out of smoke.)

Other Products for Control of Insects Infesting Stored Grains

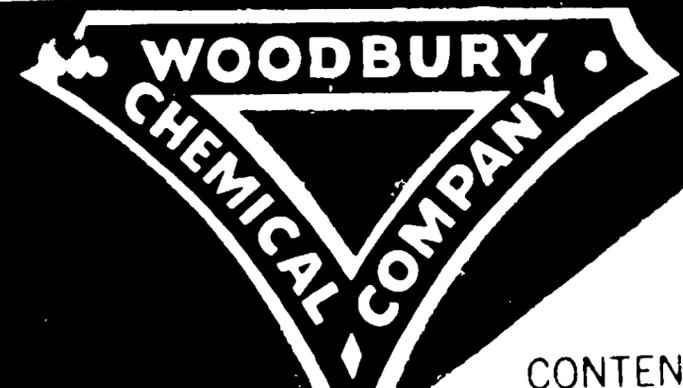

MILLFUME 66—a highly effective liquid for the fumigation of small grains or corn in flat or vertical storage. UL approved as to fire hazard "less hazardous than paraffin oil." Contains carbon bisulphide, carbon tetrachloride, and 6.6% ethylene dibromide. Persists on the surface of the grain longer than most liquid fumigants, thus is particularly effective in flat storage.

MILLFUME NO. 1—contains carbon bisulphide, carbon tetrachloride and sulphur dioxide. An excellent economy fumigant. Widely used in fumigating cars.

CLOROFUME—effective, economical and easy to use in elevator storage. Usual dosage for steel and concrete bins is 1/2 gal. per 1,000 bushels, double in frame style elevators.
